2 INCH WATERTIGHT LAP JOINT

EVERITE SLATE ROOFING

This roofing has been purchased by my customers all over the country for about 20 years. It has been tested in every climate, under all weather conditions. It has proved so satisfactory that I am absolutely confident it will meet all your requirements for a durable, leak-proof, fire-resisting roofing. It is made with a base of long fiber rag felt, thoroughly treated and saturated, then coated with heavy asphalt—NOT TAR. The slate surfacing is then imbedded into the asphalt under enormous pressure. Each roll weighs from 75 to 80 pounds and contains 108 square feet, covering 100 sq. ft. allowing for 2 inch laps. The water-tight lap-joint makes cementing easy and prevents leaks at joints.

Supplied with cement and $\frac{7}{8}$ inch roofing nails. If used over shingles be sure to specify $1\frac{3}{4}$ inch nails and add 10c per roll. Furnished in Red, Green or Gray-Black. Specify color wanted or we will ship green. Freight Paid on All Orders of \$5.00 or More.

Cat. No. 2P4

\$2³⁶

PER ROLL

ARMOR-COAT SLATE ROOFING

I earnestly recommend this roofing to those who want the very best asphalt roofing made. It has an extra heavy long fiber rag felt base. Then the felt base is thoroughly saturated and coated with hot asphalt, making it waterproof and weatherproof. After that, a heavy coating of crushed slate is forced into the surface under great pressure. The Underwriter's Laboratories have listed this roofing as Standard, saving as much as 12% on insurance when used in place of wood shingles. Each roll contains 108 sq. feet. Covers 100 sq. ft. We allow 2 inches for Watertight Lap Joint on each roll. Each roll shipped with $\frac{7}{8}$ inch galvanized roofing nails and cement. If $1\frac{3}{4}$ inch nails are desired for laying over shingles, add 10c per roll.

Comes in 3 colors—RED, GREEN or GRAY-BLACK. Be sure to state color wanted, otherwise we will ship GREEN. Every roll weighs 90 to 95 pounds. Freight Paid on All Orders of \$5.00 or More.

ASPHALT SHINGLES

Hexagonal Slabs

"Hexagonal Slab" Armor Coat Shingles are self-spacing and can be used on new buildings or over an old shingle or composition roof. Made of long fiber rag felt saturated and coated with hot asphalt, surfaced with natural, crushed, non-fading slate. Each bundle contains enough shingles to cover 50 sq. ft. exposed surface. Easy to lay, and makes a beautiful design on your roof. Approximate weight 170 lbs. per square. Colors: Red, Green or Gray-Black. If Color-Blend Slabs are desired add 17c extra per bundle. Nails must be purchased extra. When applied over sheeting use $\frac{7}{8}$ in. galvanized nails, $2\frac{1}{4}$ lbs. per square. Over old shingles use $1\frac{3}{4}$ in. nails, $3\frac{1}{2}$ lbs. per square. Nails priced at bottom of next page.

4 in 1 Shingles

These "4 in 1" Armor Coat Shingles are made of long fiber rag felt, which is thoroughly saturated and coated with hot asphalt, then surfaced with natural, non-fading, crushed slate. Can be used on new buildings or over an old shingle or composition roof. Each shingle is 10 inches long and there are 4 shingles in each strip. Easily laid and gives a perfect individual shingle effect. Put up in bundles covering 50 square feet exposed to the weather. Two bundles cover a square. Approximate weight 200 lbs. per square. Your choice of Colors: Red, Green or Gray-Black. Color-Blend furnished at 17c extra per bundle. Nails must be purchased extra. When applied over sheeting use $\frac{7}{8}$ in. galvanized nails, $2\frac{1}{4}$ lbs. per square. Over old shingles use $1\frac{3}{4}$ in. nails, $3\frac{1}{2}$ lbs. per square. Individual Shingles

Here are my "Individual Armor Coat" Shingles. You can see them on roofs all over the country. Each shingle is about 9 inches wide by about $12\frac{1}{2}$ inches long. When laid 4 inches to the weather they make an attractive roof and cover the roof with three thicknesses. They are made of long fiber rag felt thoroughly saturated and coated with hot asphalt, and surfaced with natural, crushed, non-fading slate. Can be used on new buildings or over an old shingle or composition roof. Each bundle covers 25 square feet, 4 bundles to the square. Approximate weight 245 lbs. per square. Your choice of Red, Green or Gray-Black. Color-Blend furnished at 9c extra per bundle. Nails must be purchased extra. When applied over sheeting use $\frac{7}{8}$ in. galvanized nails, $3\frac{1}{4}$ lbs. per square. Over old shingles use $1\frac{3}{4}$ in. nails, 5 lbs. per square. Nails priced at bottom of next page.

BRICK EFFECT SIDING

A Beautiful Slate Surfaced Siding for Old or New Buildings

Jim Brown Asphalt Brick Effect Siding comes in slabs, 6" wide x 36" long. Self-aligning. Each slab exposes 25/8" wide to the weather. When applied to a building, it has the appearance of brick. Each "brick" is 2 1/4" x 8 1/2". These slabs have a long-fiber rag felt base which is thoroughly saturated with hot, liquid asphalt to make it waterproof. Crushed slate is imbedded to give the appearance of brick.

Insulates—Protects—Beautifies

Not only does this durable Asphalt Siding add to the appearance of any building, old or new, but insulates your building by sealing hidden cracks, preventing winter winds from seeping through. Cut down your fuel bill in winter. Keep your buildings cool in summer. No more painting after you apply Jim Brown Brick Effect Siding. Suitable for use on new buildings or for re-siding old buildings. Furnished in Red, Buff, or Color Blend. State Color wanted. If no color is given we will ship RED. Weight 200 lbs. per square (100 Sq. Ft.), 3 bundles make a square. Price does not include nails. Requires 2 lbs. of 1 1/4-inch Galvanized Siding Nails to the square. Nails priced below. Be sure to include Brick Effect Siding Corners.

Siding Corners

Jim Brown POINT EDGE ROLL ROOFING

Ornamental—Protective—Durable

Jim Brown Point-Edge roofing has a long fiber rag felt base, impregnated with hot asphalt and surfaced with natural non-fading slate. It comes two strips in a roll as shown in illustration, giving the appearance of a shingled roof. It is easily laid and improves the appearance of a property and protects it for many years to come. Point-Edge Composition roofing is recommended for use only over old shingle and composition roofs and not over sheeting. Each roll weighs 100 lbs. When laid 12 1/2 inches to the weather, each roll covers 100 square feet.

Comes in 4 Attractive Colors

Comes in Red, Green, or Gray-Black. Colors are similar to my Everite and Armor Coat roofing shown on preceding pages. If Color-Blend is wanted, add 35c per sq. to price shown. Nails are not included. Use 1 1/4-inch galvanized nails, 2 lbs. per square. Nails are priced below.

PERFECTION Saves You Money

There are a lot of low-priced roll roofings on the market but if you have ever used them you know that they are not worth the labor of putting them on. My Perfection Roofing is LOW-PRICED but it isn't "cheap." It will give you excellent service when used as siding or on roofs having a pitch of at least 1½ inches per foot. Perfection Roofing is made of a high grade rag felt base, thoroughly saturated and coated with waterproof, pliable ASPHALT. Not a drop of tar or rubber is used. It will turn water for years, and if given an occasional coating of Black Asphalt Roof Paint (See pages 51 and 52) it will last indefinitely.

A Quality Roofing at a Low Price

At my low prices you are getting a wonderful bargain when you buy Perfection Roofing. It is way ahead of the "bargain" roofings you sometimes see advertised as "bait." Don't be fooled. Get a quality roofing like Perfection if you can't afford to buy my Dreadnaught or Slate Surfaced Roofing. Every roll of Perfection Roofing contains 108 sq. ft. and covers 100 sq. ft.—we allow 2 in. for laps. Packed with 7/8 in. nails and liquid cement. To lay over shingles, order 1¾ in. nails and add 10c per roll extra. Use 3 Ply Roofing for Permanent Roofs.

I PAY THE FREIGHT ON ALL ORDERS OF \$5.00 OR MORE.

DREADNAUGHT Mica-Galvo Surface Asphalt Roofing of Permanence

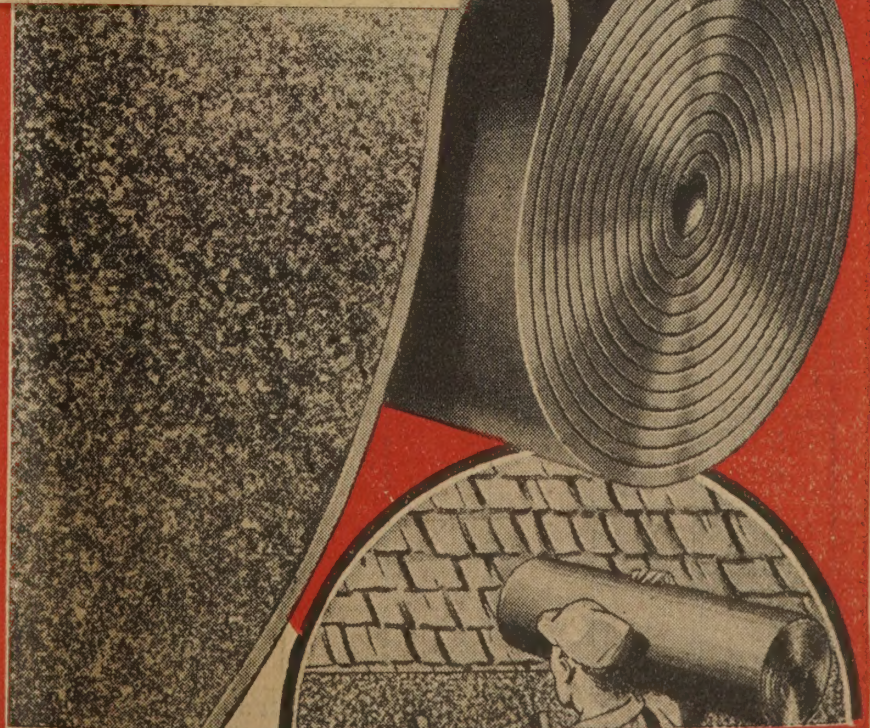

I have never seen a better smooth-surfaced roofing than my Dreadnaught. It has a long fiber rag felt base, which is thoroughly saturated with hot asphalt inside and outside. This asphalt resists cracking, peeling, drying, and blistering. It resists the sun, rain, wind, snow, and cold. It resists sparks and fire. It is a heavy roofing—even the low priced 2-ply weighs 45 to 50 pounds per roll, while the 3-ply weighs 55 to 60 pounds. The Extra Heavy 4-ply weighs 65 to 70 pounds per roll and is the most satisfactory smooth-surfaced roofing you can buy. The surface is finished with a coat of flake mica, giving it a beautiful sparkling appearance. Each roll contains 108 sq. ft. covering 100 sq. ft. allowing for 2 inch laps. With each roll I send 7/8 inch roofing nails and liquid cement. If you are going to lay this roofing over shingles, order 1¾ inch nails and add 10c per roll. Use the Heavy or Extra Heavy weight for best service. My prices save you money, especially when you consider that I pay the freight on all orders of \$5.00 or more.

Jim
Brown

METAL ROOFING

Direct From My Prime Sheets Only!

I have always saved money for my customers on Metal Roofing but now I can save you more money than ever before because I have my own Metal Roofing Factory! Compare my prices with others and satisfy yourself that Jim Brown offers you more for every dollar than anyone else.

Let me emphasize the fact that Jim Brown Metal Roofing is made of Prime Sheets only. I do not sell "culls," "seconds" or under-gauge sheets. Beware of imperfect and underweight metal roofing sold at so-called "bargain" prices. Every sheet of my Metal Roofing conforms to the building codes in all cities and States as well as to the U. S. Bureau of Standard Specifications.

My galvanized sheets are GALVANIZED ON BOTH SIDES AFTER THEY ARE CUT so there are no unprotected edges. It's a QUALITY Metal Roofing and is low priced because it is sold Direct From Factory to You.

Corrugated

Galvanized or Painted

On this page I show my Corrugated Metal Roofing. I recommend the 1½ inch corrugated for roofing and 2½ inch corrugated for siding. Each sheet is 26 inches wide and covers 24 inches, allowing 2 inches for side lap. See explanation below How To Figure Sheets Required.

My painted roofing is intended for temporary roofs and siding. It is covered with a "shop coat" of red oxide metallic paint and should be given an extra coat on both sides before putting it on buildings.

The best roofing to buy is my GALVANIZED sheets. They are PERMANENT, and with a little care will last a LIFETIME. The cost per YEAR is lower than any other kind of roofing you can buy. At my factory prices you can afford to put on this high quality galvanized roofing.

End your roof troubles once and for all. My Metal Roofing will protect your home, barn and other buildings from leaks, weather, sparks, and, if properly grounded will prevent damage by lightning. Your property and your peace of mind deserve the protection of my Metal Roofing.

Freight Paid on All Orders of \$5.00 or More.

How To Figure Sheets Required

To find the number of sheets required to go across the roof divide the length of roof by 2, as each sheet covers a space 2 ft. wide. Then decide the length of sheets required to reach from ridge to eaves and add one foot for end laps. For cyclone or gambrel roof measure from ridge to hip and from hip to eaves; figure each one separately for correct lengths of sheets.

See opposite page for typical example of how to figure number of sheets required.

AT FACTORY PRICES

Factory To You!

Full Weight—Full Gauge!

Be sure the Metal Roofing you buy is Full Weight and Full Gauge. Be sure the sheets are PERFECT, not "culls" or "seconds." Be sure the sheets are NOT CUT after they are GALVANIZED. There's a lot of "bargain" metal roofing being offered, but THERE'S USUALLY SOMETHING WRONG with it so BEWARE of it.

On the other hand, DON'T PAY AN EXORBITANT PRICE for a real HIGH QUALITY Metal Roofing! You can buy from Jim Brown SAFELY because I DO NOT SELL ANYTHING BUT PERFECT SHEETS, full weight, full gauge, galvanized with a heavy coat of pure zinc on both sides and all edges. My prices are absolutely ROCK BOTTOM because I sell my Metal Roofing DIRECT TO YOU from my own FACTORY.

and V-Crimp

An Everlasting Roof!

Jim Brown's 2-V Crimp roofing has a crimp at each side of the sheet and the 3-V has a crimp at each side as well as one in the center, giving it extra stiffness. Wood "V" sticks should be used under the outside crimps for nailing. Use lead-headed nails or galvanized nails with lead washers. (See pages 8 and 9.)

My V-Crimp Metal Roofing is made in three weights. 29 gauge is the lightest, 28 gauge is the Medium weight and 26 gauge is the Heavy Weight. I recommend 26 gauge for LONGEST WEAR. After the galvanized sheets have been up a few years give your roof a coat of paint occasionally and the sheets will last a lifetime. My 2-V and 3-V Painted Roofing is coated with a "shop coat" of red oxide metallic paint but should be painted again on both sides before being applied.

Each sheet covers 2 feet wide. We allow for side laps. Instructions are given at bottom of this and opposite page for figuring number of sheets required. Look at my prices—and remember JIM BROWN QUALITY IS GUARANTEED. Also note that I pay the freight on all orders of \$5.00 or more.

What Size Is Your Roof?

Here's how to figure the number of sheets you require. If you have a plain roof 21 ft. from ridge to eaves by 30 ft. long, divide the length (30 ft.) by 2 (2 ft. covered by each sheet). Therefore you need 15 sheets to go across the roof.

Measure distance from ridge to eaves and add one foot for end laps; figure what lengths will answer your purpose. Adding one ft. to 21 would give you 22 and the best lengths to use would be 1-8 ft. and 2-7 ft. lengths. As it requires 15 sheets to go across the roof once, you would need 15-8 ft. sheets and 30-7 ft. sheets.

Here's the Jim Brown Double Channel Non-Syphon Metal Roofing

IMPOSSIBLE For Water to Seep Through

Look at the Double Channel shown in the enlarged sectional illustration. Any water that might run up over the "small V" will be carried off by the channel formed between this "small V" and the "vertical crimp." If any water syphons over the "vertical crimp" another channel is provided on the other side so the water will drain off. If you have a roof with only a slight pitch I recommend NON SYPHON roofing. Apply this roofing with lead headed nails or with galvanized nails and lead washers. You don't need V sticks.

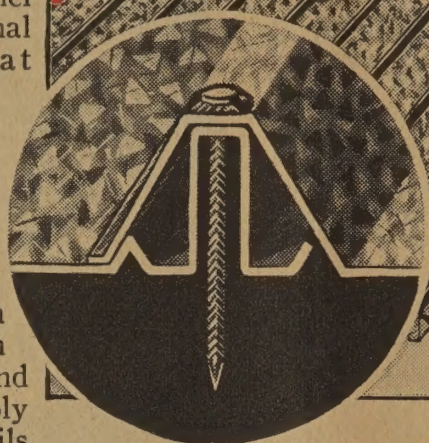

Heavily Galvanized

Non Syphon roofing is made of prime sheets, full gauge, full weight and full width, heavily galvanized on BOTH sides and on all edges. Choice of 26, 28 and 29 gauges. Every sheet covers 24 inches in width. We allow for laps.

Lead Headed Nails

1½ or 1¾ inch recommended for new roofs. 2 or 2½ inch for applying over old roofs. Be sure to STATE SIZE WANTED.

Here's a Metal Roofing For a Lifetime's Service

Jim Brown DRY AS TOAST
M-DRAIN ROOFING

Here is my "M" DRAIN watertight metal roofing. As you will see from the illustrations, each sheet of this roofing has 5 Crimps, one in the center and TWO AT EACH END. When lapped, the double crimps at each end form a DOUBLE "M." It is practically impossible for water to get up and over the two humps. My "M" Drain roofing requires no wooden "V" sticks. The crimps are designed to fit perfectly and give strength and rigidity at the laps where it is most needed.

My "M" Drain watertight roofing is made from the same quality prime sheets as my other styles of roofing, full size, full weight, and full gauge, galvanized with pure zinc spelter on both sides and on the edges. You have a choice of 26, 28 and 29 gauge material. Every sheet covers a space 24 inches in width. Also supplied painted instead of galvanized. Painted roofing should be given a coat of paint on both sides before being applied. Look at my Low Freight Prepaid Prices on this exceptional roofing.

Let Me Tell You *Why* Over 1,500,000 Customers Buy From *Jim Brown*

ONE thing that cannot be purchased is the *good will of the public*. It must be *earned*. It is earned by *constantly giving good value, good service and entire satisfaction*.

Good Will is that feeling of friendliness, kindness, confidence and loyalty which we have towards those who treat us fairly, squarely and efficiently. It makes us want to trade at certain places year after year—perhaps all our lives—in spite of the promises made by others.

My 46-Year Reputation

Ever since I began my business I have tried to earn the *good will* of my customers. Right at the start I said to myself, "Jim, if you want to succeed you've got to make it *worth while* for people to trade with you." So I made my prices *much lower than others*. I shipped the *best fencing it was possible to make*. I gave *quick service*, and I treated every customer as if my whole career depended on his *satisfaction*.

Today, I have over 1,500,000 customers and the Largest Business of its Kind in the World. Many of my customers have been buying from me for 20, 30, 35 years and even longer. Such loyalty, such friendship, such confidence cannot be bought—it must be *earned*.

Although I have been in business for 46 years, and am 70 years old, I do not live in the *past* but in the *future*. I do not expect your orders because of what I *have* done, but because of what I *am doing—today!* On this basis alone, I *know it will pay you to send me your orders*.

Lower Prices and Higher Quality

My prices are so low because I sell fencing, gates, posts, and other fencing supplies, and metal roofing, *direct from factory to you*, with *all freight paid*. I have no dealers, no jobbers, no agents, no salesmen, *no expensive chain of stores*. It is admitted by *those who should know best* that you can buy *more economically by mail* than in any other way!

My fencing is made of *Copper-Steel Wire*, with *Hi-test Pure Zinc Galvanizing*. It has been proved beyond doubt that *Copper Steel* outlasts *non-copper steel* at least *two to one*. Make the Standard Galvanizing Test and prove to yourself that the galvanizing on Brown Fence is heavier and thicker than on any other wire tested under the same conditions. I will be glad to send you a sample of Jim Brown fence wire with full instructions for making the test.

THE BROWN FENCE & WIRE CO.
CLEVELAND, OHIO " " " MEMPHIS, TENN.
Send Your Orders to My Factory Nearest You

Freight Prepaid

Every price quoted in this catalog is a Freight Prepaid Price, provided your total order amounts to \$5.00 or more. Your order will be delivered to your nearest steam Railroad Station without a cent of extra charge to you. Don't be misled by "F. O. B. Shipping Point" prices or *not prepaid* prices, because in either case you *must pay the freight*. There is *no freight* for you to pay when you deal with Jim Brown

24-Hour Service

I'm mighty proud of the 24-hour service we are giving our customers. Many orders are shipped within 8 hours. My 3 Big Fence Factories located at Cleveland, Ohio, Adrian, Michigan, and Memphis, Tennessee—and my Metal Roofing factory at Pittsburgh, as well as 35 other shipping points in cities advantageously located, enables us to ship promptly, no matter where you live.

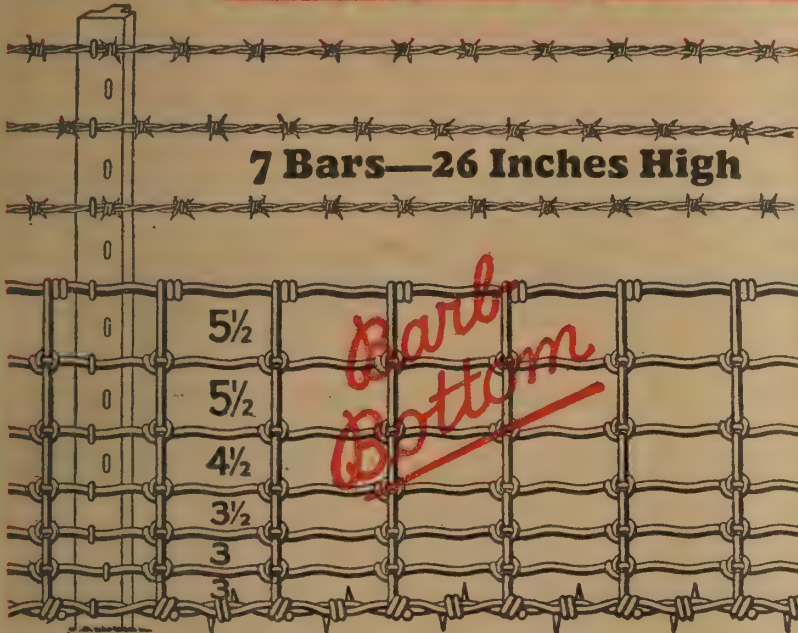

Other Bargains

Be sure to look at the pages in this catalog which quote my prices on Paints, Roofing, Poultry Supplies, and other products. When you buy these products from Jim Brown, you get a *double guarantee*—that of the manufacturer and the guarantee of Jim Brown, which, in 46 years, has *never* been broken. You will find that "You Can Always Buy It for Less From Jim Brown."

Barb Wire Bottom Hog Fences

Two styles of Barb Bottom fences—Ring Knot and Hinge Joint. Either style made in two heights with stay wires spaced only 6 inches apart. My prices are freight prepaid. Brown Fence is made of Copper-Steel Wire with Hi-Test Pure Zinc Galvanizing.

Copper Steel Wire—With Hi-Test Pure Zinc Galvanizing

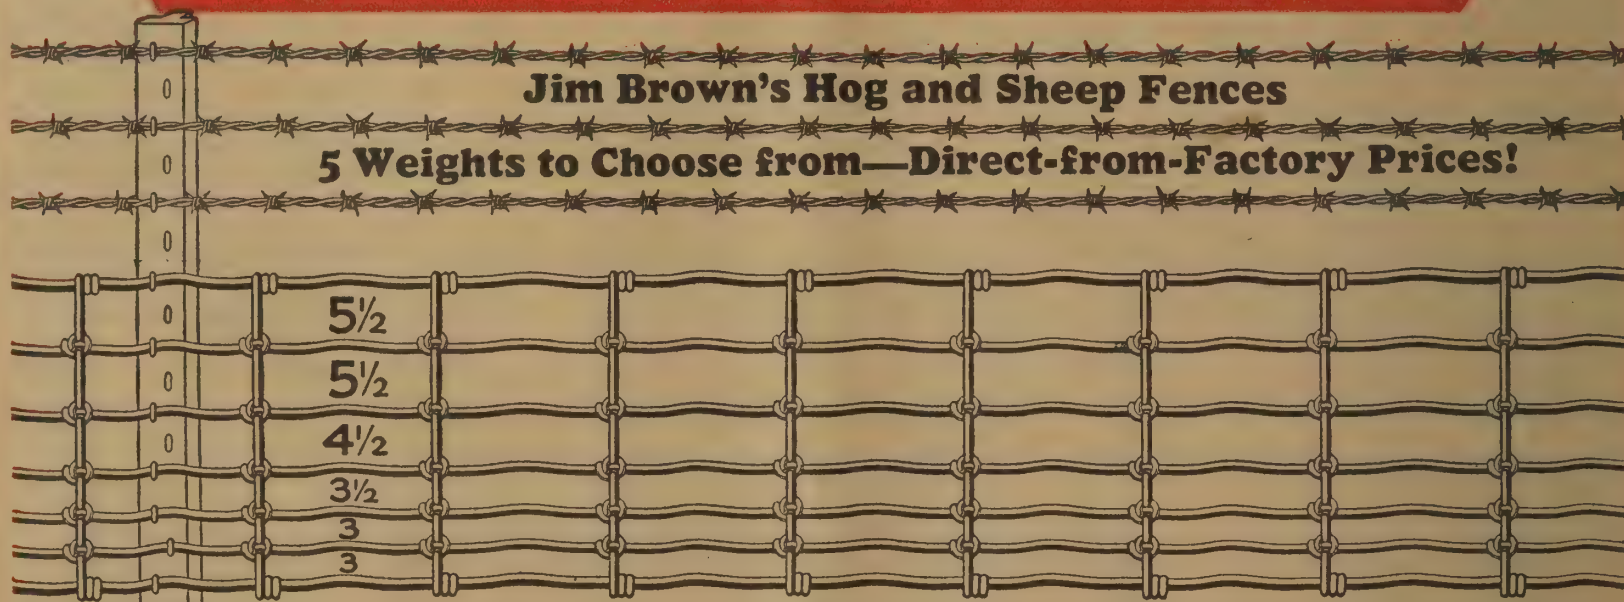

7-Bar 26 Inch Ring Knot Fences

"I am proud to say I have saved by dealing with you, not only in the money line, but in quality. I now have 200 rods of fencing I am proud of and can say that any man is wise to buy goods from Brown. It has no equal anywhere in the U. S. A."

A. L. Wise, Reva, Va.

The fences shown on this page are very popular—they have 7 bars, 26" high, are hog tight, can be moved from year to year for hogging down corn, subdividing pastures, etc. By adding two or three strands of barb wire they make very fine general purpose fences. The fences described and priced at the top of this page have stay wires spaced 12 inches apart; those at the bottom have stay wires spaced only 6 inches apart. In each style there are five different weights to choose from, all made of Copper Steel Wire, with Hi-Test Pure Zinc Galvanizing. These fences will meet your requirements perfectly. Note my low prices, freight prepaid.

Copper Steel Wire—With Hi-Test Pure Zinc Galvanizing

7-Bar 26 Inch Hinge Joint Fences

Every time I sell a roll of this fencing I make a friend. It isn't only because my prices are low, but because the fencing stands up so straight and trim and remains free from rust for so many years.

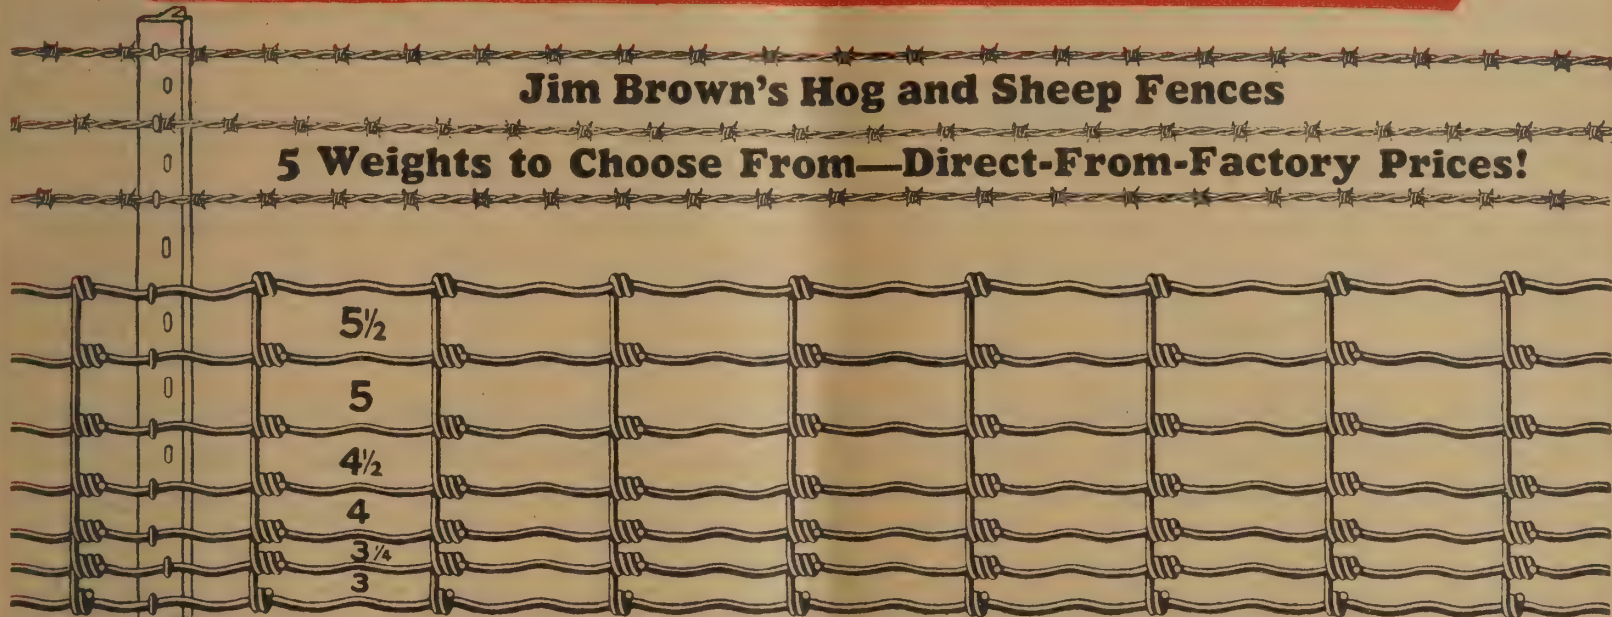

It would be easy for me to make even lower prices on fencing if I wanted to skimp on the quality, but I

have never cheapened a product in order to make a low price. Instead, I have constantly improved my products as new developments in science and invention were made. That is why all Jim Brown fencing is made of Copper Steel Wire and why every rod is further protected by Hi-Test Galvanizing with Pure Zinc.

Jim Brown Pays the Freight on All Orders of \$5.00 or More

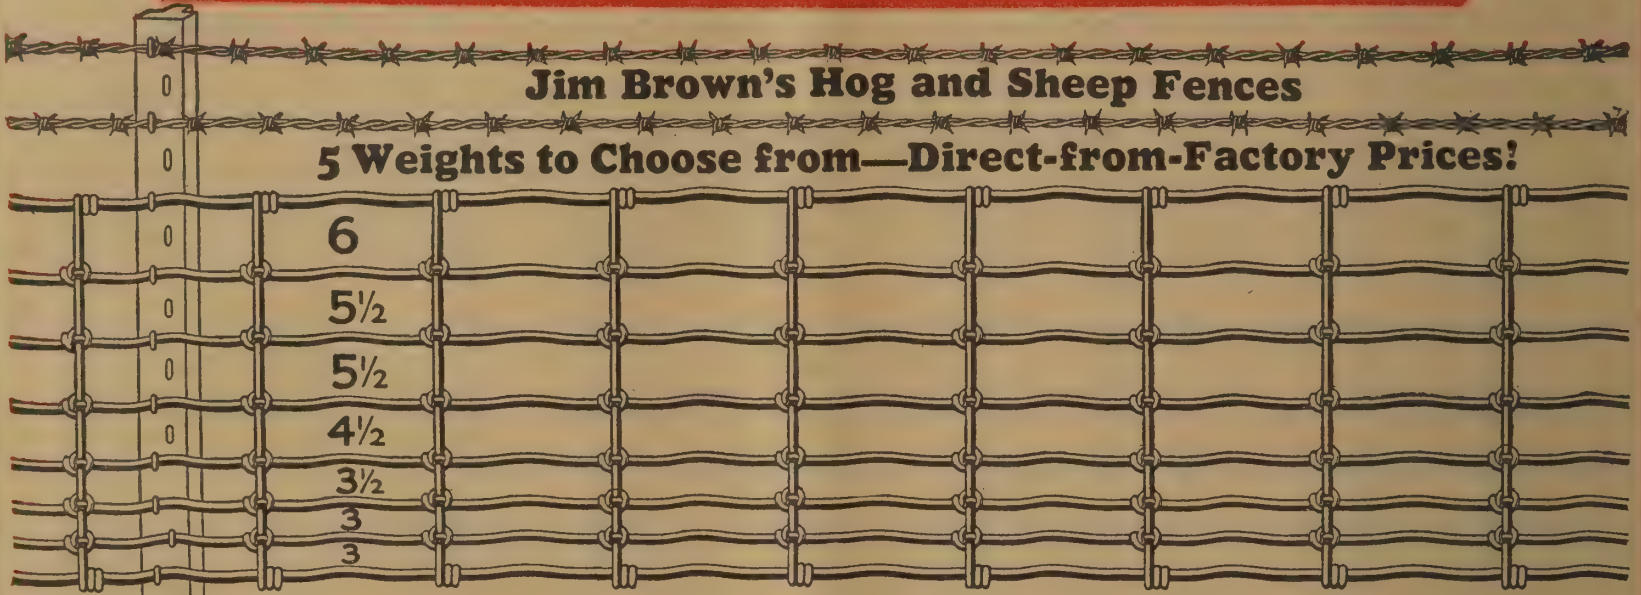

8-Bar 32 Inch Ring Knot Fences

This catalog is the biggest fence store in the world. Whatever style, height or weight of fencing you want, you will find it here. And every fence is the highest quality made. The wire is made of Copper Steel, with Hi-Test Pure Zinc Galvanizing. Here are five weights of 8 Bar 32 Inch Ring Knot Fencing with Stay Wires spaced 12 inches apart or 6 inches apart, as you prefer. Compare specifications and prices, and remember, I pay the freight on all orders of \$5.00 or more.

"I have some of your wire that I put up 21 years ago, that I bought from you and it is not the least rusty. Just as good as new. I don't expect to ever buy any wire from any one but you."

J. C. Hollenshead, Lincolnton, Ga.

Copper Steel Wire—With Hi-Test Pure Zinc Galvanizing

8-Bar 32 Inch Hinge Joint Fences

Here are 10 fences, each 32 inches high. They are wonderful hinge joint fences that are in tremendous demand among hog and stock raisers.

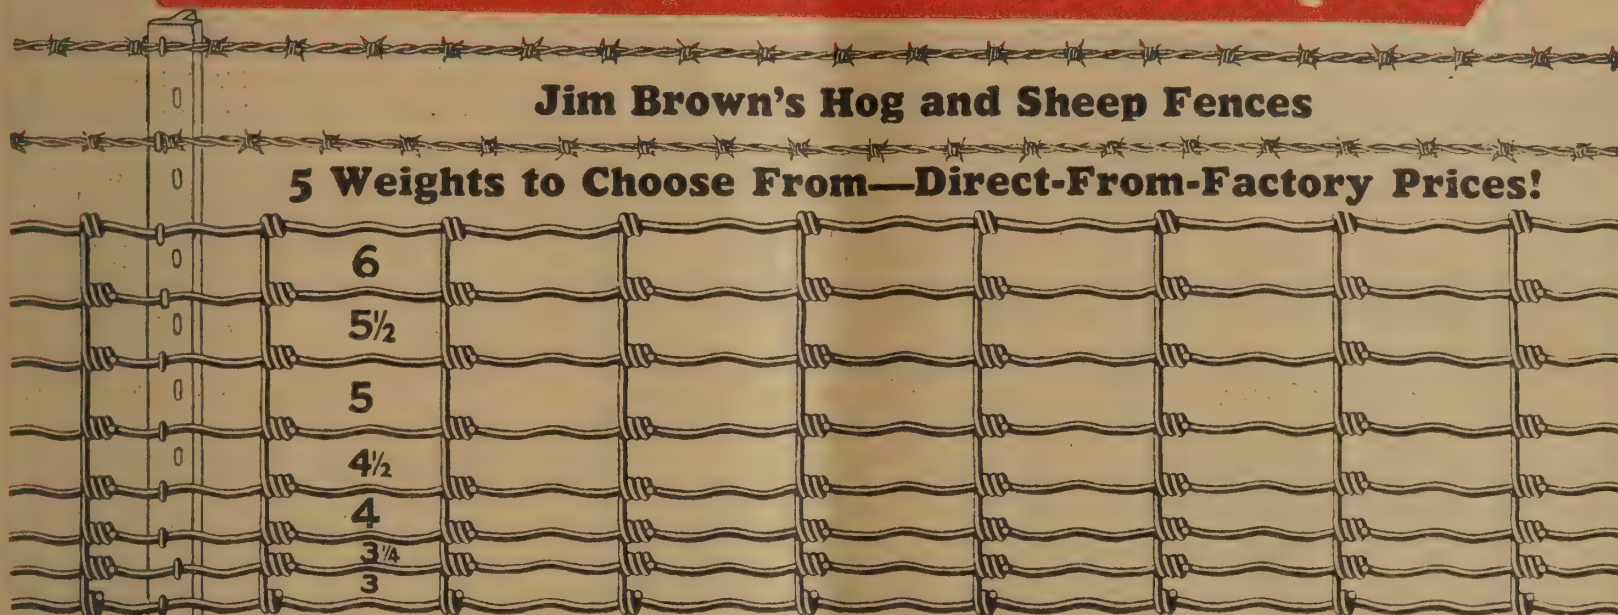

The five fences priced at the top of the page have stay wires spaced 12 inches apart and the five priced at the bottom

of the page have stay wires spaced 6 inches apart. There are five weights of wire in each of these styles—from my Junior Weight to my Extra Heavy Weight which is made of all No. 9 wire. You get a real bargain, whichever weight of fencing you buy from Jim Brown—a bargain in low price and a bargain in high quality.

11 Bar 55 Inch Fences

Shown below are my 11 bar 55 inch General Purpose Stock Fences. Supplied in Ring-Knot or Hinged-Joint styles with stay wires spaced either six or twelve inches apart. Made of Copper Steel Wire, protected with Hi-Test Pure Zinc Galvanizing.

Ring-Knot Style

Priced at the right are two Standard Weight and one Extra Heavy Weight 11 bar 55 inch Ring-Knot style fences. The two standard weight fences are made of the same gauge wires, but the fence priced in the first panel has stay wires spaced 12 inches apart, whereas the fence priced in the second panel has stay wires spaced 6 inches apart. The Extra Heavy Weight fence priced in the third panel is the same style fence but made of all No. 9½ gauge wire with stay wires spaced 12 inches apart.

Galvanized Netting

FOR POULTRY AND FUR FARMS

Straight Line and Hex Netting

Here it is! Netting that will stand up against wear and weather for years. Two designs! The ever-popular Hexagon or Diamond Mesh and the New Straight Line Mesh. Furnished in heights from 12-inch to 72-inch. Straight Line Netting furnished in 2-inch mesh 19 gauge wire and 1-inch mesh 20 gauge wire galvanized either before or after weaving.

"Hex" or Diamond Mesh Netting is supplied in 4 different mesh sizes. Note that we supply netting galvanized BEFORE weaving or AFTER weaving. We recommend galvanized after weaving for permanent structures and animal inclosures. All wires are full gauge, and spacing uniform. Look at my low prices. Save yourself money by sending me your orders. Remember, I pay the freight on all orders of \$5.00 or more.

Jim Brown Woven Picket Fence

This Ready Woven Picket Fence will give you a real, attractive, durable fence at low cost. The Pickets are made of strong, selected wood tightly held in place between 5 double twisted strands of No. 12 gauge galvanized Steel Wire. Pickets are coated with Red Paint which thoroughly saturates the wood. (Can also be supplied unpainted if you wish.) Pickets are 1½ inches wide, ½ inch thick, spaced about 2 inches apart, and are pointed at top to give added beauty and protection. Furnished only in the 48-inch height.

Jim Brown Snow Fence is exactly the same as above described, except that the wooden pickets are not pointed, which makes the price a little lower.

Wood Picket Fence with Pointed Tops	Snow Fence with Square Tops
Cat. No. 10c Per IP250 Foot	Cat. No. 9½c Per IP25.1 Foot
Sold only in 50 and 100 foot rolls.	

Fence Builders' Pliers

Here is a tool every farmer can use. Combination Pliers, Wire Cutter, Splicer, Hammer and Staple Puller. Stretches single wire for short distances. Size, 10¼ inches overall. Made of forged steel. Knurled handles.

No. 1P44

\$1.06

Fence Anchors

These Fence Anchors put a stop to your hogs pushing through under your fences. Holds the fence right down on the ground. Anchors are made of steel, 16 inches long, 1½ inches wide, about ¼ inch thick, painted with rust resisting paint. Hook over wire and tap the prong with hammer.

Cat. No. **5½ cts.** 8P20 **1/2 each**

Pure Manila Hemp Rope

Strong, long fibers are tightly twisted into strands, and three strands are used in making every size. Specially treated with oil compound which protects rope against action of water, mildew and rot.

Sizes suggested. For canvas ties, ¼"; for hitching ropes, block and tackle, ⅜", ½", ⅝" or ¾"; for haying, 7/8", 1" or 1½"; for stump pulling, and heavy work, 1½" or 1¾".

Standard Stretcher

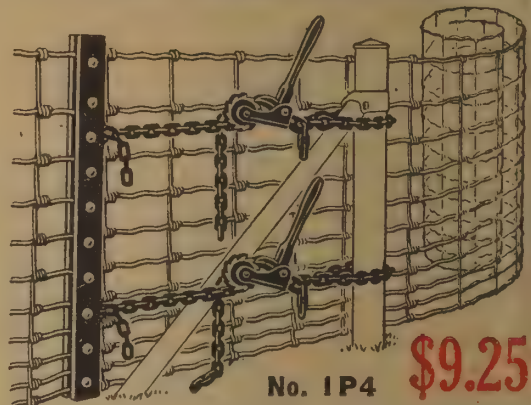

WOOD HANDLE NOT INCLUDED

No. 1P3
\$5.05

The Standard Fence Stretcher has proved to be satisfactory for all average fences. Has wooden clamp bar and is strong enough for any fence in this catalog, with strength to spare, so there is no danger of it breaking under any strain you may put it to.

Use crowbar or any suitable piece of timber in operating the Standard Stretcher, as we do not supply the handle shown in the illustration.

Double Jack Stretcher

No. 1P4 **\$9.25**

This Jim Brown Double Jack Stretcher is for extra heavy work as well as long stretches, particularly for stretching our extra heavy woven fences. The Steel Clamp Bar Double Jack Stretcher has a pulling capacity of 20,000 pounds. It consists of a steel clamp bar, 5 feet long, two heel chains, 4 feet long, and two jack chains, 8 feet long. This gives ample provision for making long stretches without making two hitches, as is usually done. The outfit includes a nut wrench and a wire twister for splicing. If you want the best Fence Stretcher that money can buy, here it is.

Single Wire Hand Stretcher

This stretcher is intended for stretching single strands of plain or barb wire, and No. 1P5 for taking up the slack between the regular heavy stretcher and the last post. **75c**

Jumbo Seamless Steel Utility Braces

Two styles, plain end and bent end. Each made of extra heavy, redrawn, seamless steel tubing. Painted with rust-resisting red oxide. Bent ends can only be used as diagonal brace. Straight ends can be used horizontal or diagonal. Better, stronger, more durable than wood, and actually cheaper.

Post Hole Diggers

Atlas

Handles made of selected Northern ash, varnished, sanded and round at top to fit the grip comfortably. No danger of handles getting loose. Handles are 48 in. long making it possible to work in comfortable upright position. Cutting blades are 9" long, lacquered a bright red for protection against rust. Shaped at bottom to give sharp fast cutting edge in either wet or dry soil. No suction when removing dirt from hole. **Cat. No. 1P33. \$1.47**

Lock Lever

Don't break your back digging post holes with a spade. The Jim Brown Lock Lever Digger makes post hole digging easy. The ease of operation is due to the short lever handle which, when pushed down, holds the blade vertically; and when pulled up turns the blade horizontally. This makes it easy to lift out the dirt. Will work in all kinds of soil.

The 4½-foot handle is made of seasoned, straight grained ash. The blade is high carbon steel, treated and tempered to insure long wear. **Cat. No. 1P32. \$1.78**

Auger Type

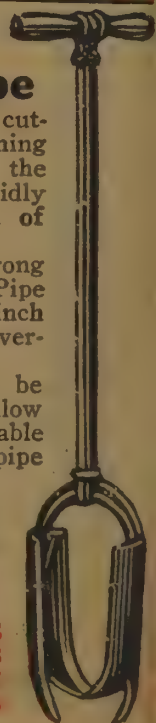

A high grade, fast cutting auger. By turning handle auger-wise the steel blades dig rapidly in almost any kind of soil.

Top handle is strong seasoned wood. Pipe handle measures 1 inch outside diameter. Overall length 47 inches.

This tool can also be used for boring shallow wells by adding suitable lengths of ¾-inch pipe to handle.

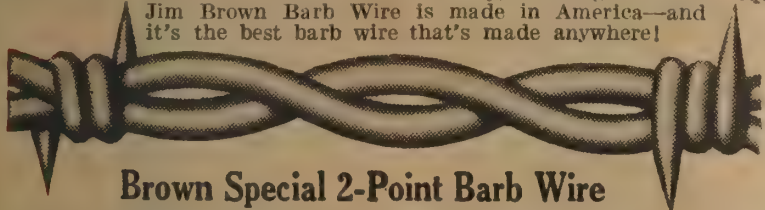

Supplied in sizes for boring holes from 4 inches to 9 inches in diameter.

Freight Paid on All Orders of \$5.00 or More.

Tie Wire for Attaching Fencing to Posts

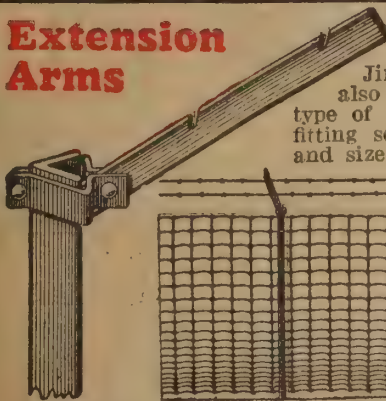

Also used for repairing broken fences where short lengths of wire are needed. Ideal for attaching any kind of fencing to steel posts where staples cannot be used. Comes only in 12 inch lengths. Made of No. 12 wire, heavily galvanized with pure zinc.

If you are putting up a fence order a bundle of this tie wire. You will find it a handy thing to have. With each bundle I include a special wire twister free. About 100 wires in each bundle.

Cat. No. 1P95. Price Per Bundle, 100 Pieces.....35c

Extension Arms

for Barb Wire

Designed for use with Jim Brown Steel Posts, also for wood posts. Each type of post requires a different fitting so be sure to state kind and size of post you wish to use them on.

These fittings are made of steel and will last indefinitely. The barb wires fit into slots or grooves and are tightly

held in place by tapping with a hammer.

Post Driver

The tool you need to drive steel posts. One man can drive steel posts straight and true with amazing speed. Just slip open end of this WEIGHTED post driver over top of post — place post in upright position, then raise and lower driver with "pile driver action" and your post is set in a few seconds. Can be used for driving any style of Jim Brown steel line posts. Order one with your posts.

PAINTED STEEL LINE POSTS

Made of High Carbon Rail Steel

Just look at these strong, sturdy steel Line Posts. They are made of Carbon Rail Steel, the kind that railroads use for rails. You know the wear and tear that rails must stand, so you can imagine what service these POSTS give. They have strength and stiffness without being brittle. They stand up straight and true for years in any weather, against any strain. Each style of post is pointed for easy driving—and has a large anchor plate which prevents it from turning in the ground.

I save you a lot of money on Angle or Tee Style Line Posts, Punched for use with staples, or Self-Fastener styles.

My New Victory Posts (catalog No. 8P31) shown at the left are the last word in steel line posts. They have five (5) Ground-Bearing-Surfaces which prevent loosening or bending even under great strain. Have heavy, solid backbone with knobs that hold the fence in position. Best post ever made at my **LOW PRICES!**

All prices shown below are for my Painted Line Posts. Each post is given a heavy coating of Red Oxide Compound which protects them against rust in all climates. Look at my Low Freight Prepaid Prices on these 5 styles of Steel Line Posts. You can now afford the best in fence posts at a big saving. Why use wooden posts? Why pay more elsewhere for steel posts not as good? Remember, I pay the freight on all orders of \$5.00 or more.

GALVANIZED STEEL LINE POSTS

Five Styles to Select From

The 5 styles of posts displayed on this page are my Galvanized Line Posts. They are the same style, material and workmanship as painted posts described and priced on the opposite page but have the added feature of a heavy coating of Pure Zinc Galvanizing which adds years to the life of these posts.

You've never seen the equal of these posts for strength and durability at anywhere near my Low Freight Prepaid Prices. I especially recommend my Victory Posts, with the solid studded backbone. The 6 "Easy Fastener" Wire Clips which are furnished with each Victory Post without additional cost, hold the line wires firmly in place, yet allow "play" for rolling ground. The small circular illustration at the upper right shows how the fasteners snap around the posts.

With each order for Punched Angle or "Tee" Posts a "Jiffy" Staple Fastener is furnished Free. The lower circular illustration at the right shows how staples are fastened with Free Staple Fastener.

My Self-Fastener Angle and Tee Posts are a boon to Fence building. You stretch your fence and one blow with a hammer securely holds the wires in position. The bottom lugs or fasteners on these posts are turned down to keep hogs from rooting the fence up.

All of the posts illustrated on this page and priced below are Heavily Galvanized by the Hot Dip Process in a bath of Pure Molten Zinc. By this method the metal is sealed against the elements with a smooth uniform coating of rust-proof Zinc.

Look at my Low Prices and you will realize how much you save by sending me your order. Remember, I pay the freight on all orders of \$5.00 or More.

Cat. No. 1P7 **38c** For 5 Pounds

FAULTLESS Tubular Seamless STEEL POSTS

Line, End, Gate and Corner Posts

For beauty as well as strength, I earnestly recommend my Faultless Tubular Posts. Made of Redrawn Seamless Steel tubing, they are heavier and stronger than any other round post of the same diameter I have ever seen. No seams or welds to open. NOT MADE OF SHEET STEEL, but of heavy tubing. Whether you use these posts for lawn fencing or field fencing, you can rest assured they will stand any strain put upon them for they are much stronger than the average round post of equal diameter. The top of each post is finished with a heavy ornamental ball top, securely wedged in place, making these posts moisture proof. Please do not compare these posts with others of the same diameter, because these are much heavier and stronger. My Direct-From-Factory-Freight Prepaid price on these posts saves you a lot of money.

The end and corner posts come to you complete with all necessary collars, bolts and adjustable braces which can be set at any angle.

Painted or Galvanized

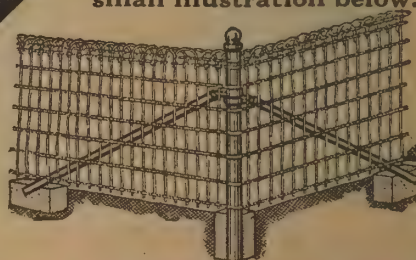

These Faultless posts can be supplied galvanized or painted. The painted posts have a heavy coating of green paint and will stand up for a long time without attention. The galvanized posts have a heavy coating of Hi-Test Pure Zinc which will protect them from the elements for years to come.

For fences up to 48 inches high, we recommend that you order End, Gate and Corner Posts 30 inches longer than the height of the fence. For fences over 48 inches high, order End, Gate and Corner Posts 36 inches longer than the height of the fence.

E-Z End, Gate and Corner Posts

Heavy Rail Steel Angle Post That Won't Bend or Break

These posts are made of heavy rail steel angles, scientifically engineered and designed. Braced like a steel bridge. The long upright angle is extra heavy, measuring 2"x2"x1/4" thick. The long brace measures 1 1/2"x1 1/2"x1/4" thick. The two smaller braces measure 1 1/2"x1 1/2"x3/16" thick. The extra heavy material used together with the scientific angle at which the braces are placed keeps these posts from bending, breaking or pulling out, regardless of the strongest pressure to which they are likely to be put. If these posts are properly set in concrete you should have the strongest, stiffest end, gate, or corner post, that can be built.

Painted or Galvanized

"E-Z" posts are supplied either painted with Red Oxide Rust-Resisting compound or Galvanized by the Hot Dip process in Hi-Test Pure Zinc Spelter. Compare my prices. Just see how much Jim Brown saves you. Remember I PAY THE FREIGHT on all orders of \$5.00 or MORE.

End or Gate Posts have one brace as shown in large illustration. Corner Posts have two sets of braces as shown in the above small illustration.

JUMBO Steel Corner, End and Gate Posts ~

3 1/4" and 4" Extra Heavy Seamless Steel Posts for a Lifetime's Service!

These big strong posts are made in two sizes, 3 1/4 inch outside diameter and 4 inch outside diameter; of heavy seamless steel tubing. Practically impossible to bend or break them. They are about twice the size of ordinary tubular posts, and several times as strong. The top end of each post is sealed with a heavy metal cap, making it ornamental and absolutely water-tight, preventing moisture getting inside to rust and shorten the life of the post. These posts are painted inside and out with non-rust Red-Oxide Metallic Paint. Posts come complete with all necessary bolts and braces. End or Gate posts have 1 brace, Corner posts 2 braces. Braces adjustable to any angle.

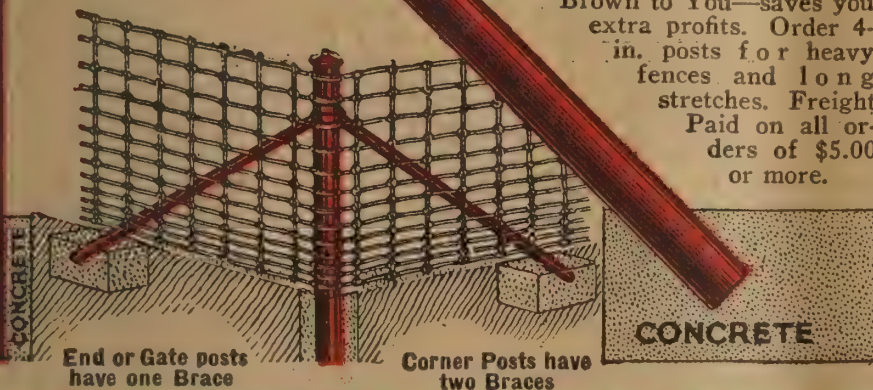

The reason I am able to sell you these Big, Strong, Heavy Steel posts

at the low prices quoted is because my Straight Line Selling Plan—from Jim Brown to You—saves you extra profits. Order 4-in. posts for heavy fences and long stretches. Freight Paid on all orders of \$5.00 or more.

My New DIRT SET POSTS

No Concrete Necessary for Setting These Big, Strong Seamless Steel End and Corner Posts

I have been experimenting for years to produce a Dirt-Set End, Gate and Corner Post that really stays in the ground even though you stretch your fence on it as tight as a violin string. At last I have it! These great big 3 1/4-inch and 4-inch Extra Heavy Posts have stood every test. We have stretched heavy No. 9 fence on these posts and pulled them as tight as we could with a Double Jack Stretcher and these posts were as solid as a rock.

Stretch Your Fence Without Waiting

You do not need to use concrete in setting these Dirt-Set Posts. Just dig a hole—put the post in the ground and tamp the dirt solidly on the bent "foot" and against the post. The breast plate and anchor plate drive into the ground with a sledge or maul. You can stretch your fence as soon as the posts are in the ground—you don't have to wait.

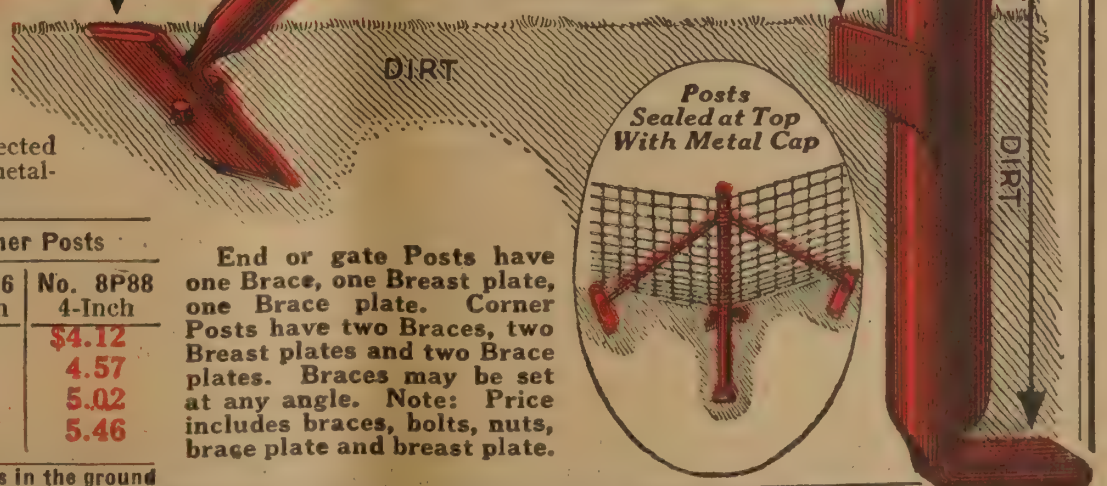

Extra Heavy 3 1/4" and 4" Posts

These Dirt-Set Posts are made of Extra Heavy Seamless Steel Tubing with unusually thick walls. Their thickness and weight provide strength greater than they will ever require. Protected from rust, with a heavy coating of special metallic Red Oxide compound.

**Freight Paid
On All
Orders of
\$5.00 or
More**

3 Big Features

The "Foot" (Feature No. 1) absolutely keeps my Dirt-Set Posts from lifting out of the ground. The dirt packs on this "foot" so tightly that it can't come up! The Breast Plate (Feature No. 2) is not fastened to the post but is driven into the ground after post is in; keeps post from budging at the ground line. Brace Plate (Feature No. 3) is securely bolted to brace. When driven into the solid ground it cannot be budged.

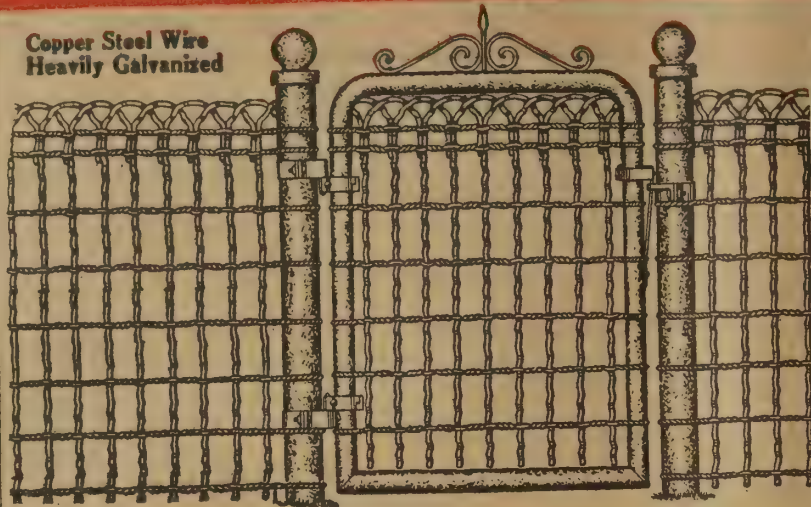

Length of Post	End or Gate Posts		Corner Posts

Style "K" a Real Poultry and Farm Gate

Style "K" Poultry and Farm Gate

Designed to match up with any of our heavy poultry fences. Or they can be used, as regular standard stock-proof drive or walk farm gates. Frames are made of high carbon steel tubing, 1 1/4 inch O. D. in one continuous piece. All the joints are welded, which makes the frame absolutely rigid and watertight. Filling is all No. 12 1/2 gauge Copper Steel, heavily galvanized Poultry Fence. Cross bars 6 inches apart. 8 and 10 ft. gates have 1 upright brace; 12 and 14 ft. have 2; 16 ft. has 3.

Cat. No. IP622

SELF-RAISING GATES

Barb Wire Top Is Part of the Gate

Release Latch—Up She Goes!

This gate raises itself automatically, about a foot and a half off the ground when the latch is released. It swings freely above snow, stones, hummocks and uneven ground. You can let small stock go from side to side while keeping the larger stock on the side you want them.

Top and bottom of frame of high carbon steel tubing, 1 1/2 inches in diameter. Ends are 2x2 1/2 "U" Bars. Wire is all big, extra heavy No. 9 1/2, galvanized. Cross wires only six inches apart.

Cat. No. IP638

Width Between Posts	54 in. high	60 in. high
10 feet	\$ 8.49	\$ 8.69
12 feet	9.36	9.46

14 and 16 ft. Gates have two upright braces; 10 and 12 ft. size has one upright brace.

Freight Paid on All Orders of \$5.00 or More

Note.—My Self-Raising Gates come to you in the raised position. When in closed position gate is perfectly level.

IMPORTANT NOTE! All prices shown are for gates with fittings for wood posts. If steel post fittings are wanted, add 50c per gate and state size and shape of posts to be used. If narrower gates are desired, use price of next wider size. Gate Posts shown on Pages 32 to 34.

DIRECT FROM FACTORY at Factory Prices

Style "M" Extra Heavy 1 $\frac{5}{8}$ In. Frame—All No. 9 $\frac{1}{2}$ Wire Filler

Wonderful Values

Here is a strong, sturdy gate, built extra heavy throughout. Strongly braced frame of extra large sized tubing, heavily Galvanized and welded at all joints, making the frame practically one piece of tubing. Filler No. 9 $\frac{1}{2}$ Copper Steel wire—frame 1 $\frac{5}{8}$ in. O. D.—entire gate heavily galvanized. A wonderful value.

If above gates are wanted with barb wire top as shown below, order style "MB" No. 1P631, and add \$1.00 to price.

Chain Link Fencing

Made of Copper Steel Wire with
Hi-Test Pure Zinc Galvanizing

Protection and Beauty for Estates, Parks and Factories

There is no better fence made for the protection of children and pets than this attractive Chain Link Fence. For industrial plants it is better than a watchman because it is always on the job. This fence comes in Heavy Weight No. 11 gauge wire and Extra Heavy No. 9 gauge wire. Wires are continuous and inter-twined from top to bottom, are non-climbable and form a perfect 2-inch mesh. The top is barbed and the bottom is knuckled. Top and bottom both can be furnished barbed if specified on your order.

This Chain Link Fence, made of Copper Steel wire, is heavily galvanized with Pure Hi-Test Zinc, insuring lasting quality.

If you want a complete Chain Link Fence, including line posts and top rails, kindly send us a sketch of the ground to be fenced. Be sure to mark distances between end, corner, and gate posts, also indicate size and number of gates required. We will send you our estimate together with a complete list of material required.

Raise More Chicks! Use Jim Brown Brooders!

DOUBLE DRAFT AUTOMATIC COAL BROODER

Here is a brooder that will mother your chicks without worry on your part. Just keep it filled with hard or soft coal. Heavy cast iron body—shaped so fuel feeds down as it is burned—no clogging. No complicated indirect flue passages. Extra large fuel pot. Rocker type grates. Direct draft through fuel bed to 5-inch smoke pipe. Gases usually wasted are burned up. Flue collar equipped with damper. Temperature automatically regulated by double wafer thermostat attached to air intake and check draft. Burns 36 hours with one filling of coal, without attention. Large fuel door.

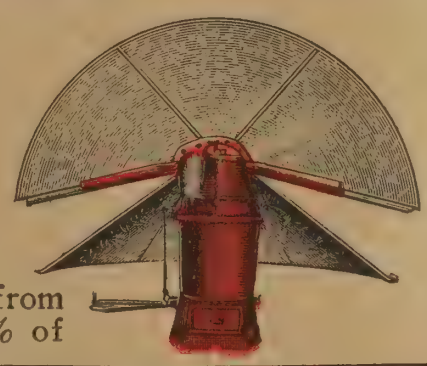

Revolving canopy is 26 gauge galvanized steel, in 4 sections. Can be swung around for convenience. One section hinged. A wonderful brooder at a sensationally low price. Comes in 3 sizes as shown above. All Jim Brown Coal Burning Brooders Burn Hard or Soft Coal.

Cat. No.	Size Canopy	Coal Capacity	Chick Capacity	Prepaid Price
7P300	48 in.	40 lbs.	300-500	\$11.32
7P301	52 in.	50 lbs.	500-750	13.02
7P302	56 in.	50 lbs.	750-1000	13.72

Jim Brown RED WONDER Best Coal Burning Brooder Made!

Canopy Suspended from Top of Magazine Saves 50% of the Heat

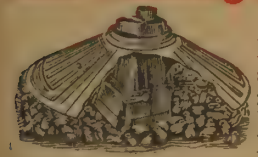

Here is the very last word in Coal Brooders! Every detail of design and construction makes it strong, dependable, convenient, and economical. The large non-clogging magazine gives it exceptional coal capacity. Position of canopy extending from top of magazine saves 50% of the heat usually wasted.

Hard or Soft Coal
Double wafer thermostat placed high above body heat of chicks; automatically controls temperature by opening and closing check draft and air intake; positive in action. Holds soft or hard coal fire overnight. Bottom of stove lined with 1-inch insulation—no charred floors! Large shaker grates. No baffle plates to clog. Safety type two-piece galvanized steel canopy is hinged to raise from either side. No ropes or pulleys. Every Red Wonder is equipped with fuel-saving Automatic Draft Equalizer. We have never seen the equal of this brooder stove anywhere, at any price. Made in three sizes as shown above. Smoke pipe not included. Brooder No. 7P305 takes 4-inch smokepipe, others 5-inch.

Cat. No.	Size Canopy	Coal Capacity	Chick Capacity	Prepaid Price
7P305	54 in.	40 lbs.	750	\$13.85
7P306	62 in.	52 lbs.	1000	16.08

Lighting Rings

For use with Blue Flame Oil Brooders using asbestos lighting rings. Sold only in sets of 3 rings.
No. 7P6—11 in. long. Per Set 40c
No. 7P7—15 in. long. Per Set..... 53c
For my Oil Brooders shown at top of page.

AUTOMATIC BLUE FLAME

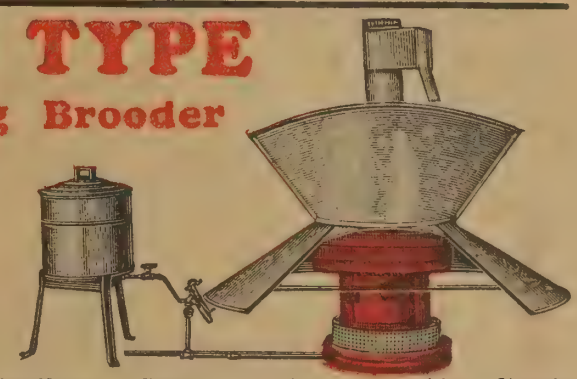

Fumeless, Smokeless, Oil Brooder

Here is an oil burning brooder that is built with more safety features in its construction than any other oil brooder I have ever seen. Has giant 5 in. burner, which produces plenty of heat without forcing. Self-centering chimney means no smoky flames. Burner and oil reservoir rigidly mounted in metal housing. Burner always level, does not tilt or rock. Fuel feed controlled by positive needle valve through double thermostat wafer, reducing or increasing flow of oil as temperature changes. Patented heat equalizer under canopy spreads heat so chicks do not crowd. Less than 5 degrees warmer at center of canopy than at edge. 26 gauge galvanized steel canopy, hexagon shaped. Made in 3 sizes, each a money-saving bargain.

Cat. No.	Size Canopy	Chick Capacity	Prepaid Price
7P310	32 in.	350	\$8.25
7P311	42 in.	500	8.77
7P312	52 in.	650	9.30

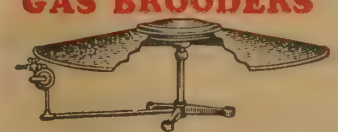

DRUM TYPE Oil Burning Brooder

When it comes to drum-type oil brooders I don't take my hat off to any competitor, no matter what his prices are. This brooder has a high-efficiency burner, uses kerosene or distillate. Cast iron flame spreader directs flame to outer edge of fire bowl. Center air intake and 5-inch center flue provide perfect carbonless combustion. No wicks, no soot, no constant cleaning. Insures even distribution of heat and flame—no hot side. Heat regulated by flow of oil and is cut down or increased by double wafer thermostat, depending on temperature. Absolutely automatic and reliable. Sight feed shows how fast oil is flowing. Each drum-type oil brooder is equipped with automatic draft equalizer; eliminates ill-effects of high winds, saves fuel. 20-inch drum is made of heavy gauge sheet iron lock-seamed and welded. Canopy made of 26 gauge galvanized steel, hinged so one section can be raised. In 52 and 62-inch sizes canopy top is insulated. Because of its scientific design, these brooders use much less fuel than any others we know of. Here are real bargains. Note that my price includes tank and stand as illustrated. Remember, I pay the freight.

Size Canopy	Chick Capacity	With Tank & Stand Cat. No.	Price
30 in.	300	7P320	\$11.99

Roost-Proof Broiler Feeders

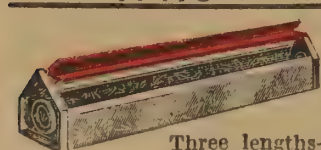

For chicks 3 weeks old to pullet size. Adjustable stand so chicks cannot climb; prevents fouling feed. Turned flanges prevent waste. Made of 26-gauge galvanized sheet steel, welded ends. Size 42 inches long, 6 3/4 inches wide at top, 3 inches deep. Capacity 10 1/2 quarts. Cat. No. 7P174—I for.....\$1.05

Chick To Broiler Feeder

With Adjustable Reel Top

This is the same feeder described above except it has revolving reel at top instead of wire grill. Reel is adjustable to 3 heights. There are no feeders that compare with these at my prices. Capacity 10 1/2 qts. Cat. No. 7P175—I for.....\$2c

REEL TOP CHICK FEEDER

Three lengths—All 4 inches wide, made of 26 gauge galvanized sheet steel. Ends are die stamped and set in with electric spot welding. Turned edges prevent injury and waste. Reel is adjustable to 3 positions so feeder can be used for day old chicks or pullets. 2 ft. feeder packed two in a box. We do not sell less than a full box.

No. 7P179—2 ft. long. 2 Feeders for.....	67c
No. 7P180—3 ft. long. 1 Feeder for.....	43c
No. 7P181—4 ft. long. 1 Feeder for.....	53c

SPRINGLESS EGG SCALE

Shows weight of each egg and per dozen at same time. Absolutely accurate. Not a flimsy toy but a real scale. Finished in Duco and Chromium. Adjustable stop can be set to grade eggs of any weight.

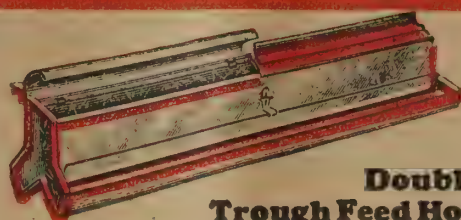

No. 7P280—Egg Scale. Price....\$1.70 Each

Thermometers

At left is shown incubator thermometer mounted on stand. Bulb rests on level with eggs. Easy to read. 4 in. long. At right is shown brooder thermometer. Tube filled with red liquid, easy to read. Mounted on metal. Guarded bulb.

No. 7P260—Incubator Thermometer.....	60c Ea.
No. 7P261—Brooder Thermometer.....	42c Ea.

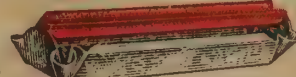

Double Trough Feed Hopper

Holds 18 quarts of dry mash. Each trough is 35 inches long, giving 70 inches of feeding space. Wire guard is adjustable up and down to control width of eating space. V-shaped bottom forces feed into trough. Feed always fresh and clean. Hinged lid makes hopper easy to fill. Tilting device at top prevents roosting. This feeder is ideal for day-old chicks to pullets. Made of 26-gauge galvanized sheet steel, with welded ends and turned edges. A real bargain at my price.

Cat. No. 7P182—I for.....\$1.45

One-Piece Chick Trough

Can be used for feed or water. No seams or joints. Stamped out of heavy 26-gauge galvanized sheet steel. Edges along trough are flanged to prevent waste, and folded over to prevent injury to chicks. Revolving metal reel prevents roosting. Trough measures 1 1/2 in. deep, 2 1/2 in. wide at bottom. Sold only in packages of 3 as shown. A wonderful value in a quality chick trough.

No. 7P190	Size 16 in. long	3 for 52c
No. 7P191	Size 22 in. long	3 for 64c

MASON JAR FOUNTS

These are the new Clamp Top type. Easy to attach to Mason Jar. Easy to clean. Two styles, GLASS or GALVANIZED STEEL. Glass is ideal for buttermilk or medicated water. Galvanized pans are die stamped and have turned edges. Jars not supplied. Packed 6 to a box. We do not sell less than a full box.

No. 7P200	Galvanized	6 for 39c
No. 7P201	Glass	6 for 66c

SNAP-ON CHICK WATERER

Water can fit snugly on pan. Six drinking spaces large enough for 12 chicks at one time. Flat top. Easily filled when inverted. Made of 26-gauge galvanized sheet steel. 1 and 2 gal. sizes only. A real bargain.

Cat. No. 7P220—1 gal. 1 for.....	46c
Cat. No. 7P221—2 gal. 1 for.....	63c

Thermostat Wafers

measure your old wafer to get correct size.

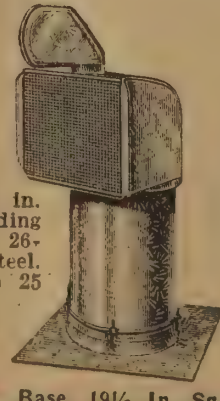

No. 7P270—Double Wafer, 3" size.....	40c
No. 7P271—Double Wafer, 4" size.....	50c

We Pay Postage on Wafers. STATE NAME OF INCUBATOR OR BROODER and give size and description of studs.

BALL BEARING VENTILATOR

Revolving head moves on ball bearing. Swings with slightest shift of wind. Bird-proof head covered with wire cloth screen. 12 in. flue. 30 in. high not including weather vane. Made of 26-gauge galvanized sheet steel. Adjustable for roofs up to 25 degree pitch. Every poultry house needs one or more.

No. 7P290—Ventilator. Each.....	\$5.25
---------------------------------	--------

Base, 19 1/2 In. Sq.

Double Wall Vacuum Fountain

Easily filled and cleaned. Double wall keeps water cool in summer, retards freezing in winter. When outer tank slides into place it opens spring valve and releases water. Operates on vacuum principle. Cone top prevents roosting. Tanks are 28 gauge galvanized sheet steel. Seamless drinking pan is 26 gauge galvanized sheet steel and has smooth rolled edge. Securely soldered to inner tank. Narrow drinking space prevents chicks from drowning. Made in 1, 2, 3, 5 and 8 gallon sizes. 3, 5 and 8 gallon sizes can be used with heater and stand shown below. Every detail of these fountains has been worked out to perfection, yet my prices are lower than are asked for ordinary cheap fountains.

Cat. No.	Capacity	Price Each
7P202	1 gal.	\$.75
7P203	2 gal.	.98
7P204	3 gal.	1.40
7P205	5 gal.	1.77
7P206	8 gal.	2.20

Popular Float-Valve Fountains-5 and 8 Gal.

Here is a float valve fountain that really works. I think it's the best fountain of this type ever made. Large flat copper float keeps water automatically at right level. Non-roost cone top lifts off so water can be poured in easily. Removable drinking pan, made of 24 gauge galvanized steel, is easy to clean as a plate. Tank made of 26-gauge galvanized sheet steel with rolled-over wire top and bottom. Supplied with heavy wire ball for carrying.

Water flow can be shut off when fountain needs filling. These high quality fountains are ridged for extra strength. You may be able to get cheaper fountains but they will cost you more in the end. At my prices you can afford the best. Made in 5 and 8 gallon sizes only. Illustration shows fountain complete with heater and stand. For price of heaters and stand see below.

Cat. No. 7P207—5 gal. Fountain only.....	\$2.38
Cat. No. 7P208—8 gal. Fountain only.....	2.74

HEATERS

Jim Brown heaters remove the chill, prevent freezing and enable hens to drink all the water they want. Burns kerosene (coal oil) 30 hours with one filling. Base is perforated for ventilation, and has hinged door. Made of 26 gauge sheet steel.

Cat. No. 7P215—For 3 and 5 gal. Double Wall Fountain (No. 7P204 and 7P205).....	\$1.30

NEW YOUNGBERRY

The newest and greatest of all the berry family. It is a cross between the Loganberry and Dewberry. Bears very heavily, ships well, keeps well, cans well, and has so many possibilities that every home should have a few bushes or a commercial planting.

It has now been tested for three or four seasons and the yield has been measured at 20,000 boxes per acre. The largest berry grown and will produce more than any other variety. Does best in states the same latitude as Ohio and south but will thrive where any other bush fruit grows. Now offered at the following low prices. Prepaid.

Cat. No.	5 for	10 for	Per 100

Sprayers, Dusters, Lawn Mowers at Bargain Prices

Continuous Sprayer

4 gal. heavy brass or galvanized steel tank. Seamless brass pump develops great pressure. Safe cam locking device. Automatic shut-off is instantaneous in action. 5 ply hose; 2 ft. brass extension and screen nozzle.

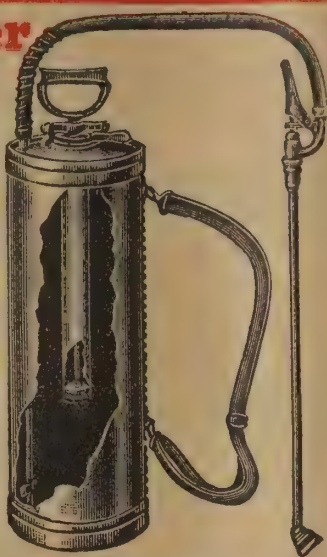

It throws a continuous misty spray, fine for fruit trees, garden truck, vines, berries, etc., and for spraying whitewash, cold water paints, washing windows, automobiles, etc. Has adjustable carrying strap. Tank diameter 7½ inches, height 22 inches. Two pumpings of air will discharge the entire contents.

No. 5P153
Galvanized Tank

\$4.80

No. 5P154
Brass Tank

\$7.36

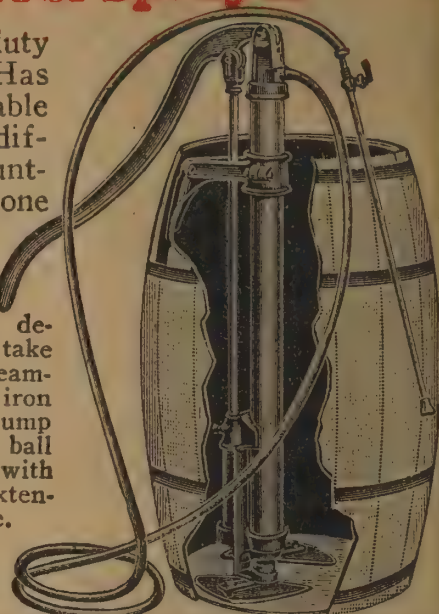

Big Boy Barrel Sprayer

Large capacity, heavy duty pump, durably constructed. Has heavy agitator and adjustable clamp to enable use with different size barrels. By mounting barrel on wagon or stone boat, it can be easily moved. Sprayer can also be used for whitewash, kalsomine and cold water paints. Pump develops 300 lbs. pressure and can take care of 2 lines of hose. Heavy seamless brass pump cylinder; heavy iron pipe air chamber; semi-steel pump top, handle agitator, bronze ball valves. Height 41". Equipped with 12½' of 5 ply hose, 2'-8" iron extension, stop cock and screen nozzle.

Barrel not supplied.

Cat. No. 5P152 **\$9.86**

2 Gal. Continuous Sprayer

Similar to above, only it has a 2-gallon galvanized tank and is lighter in construction.

Cat. No. 5P102 **\$3.15**

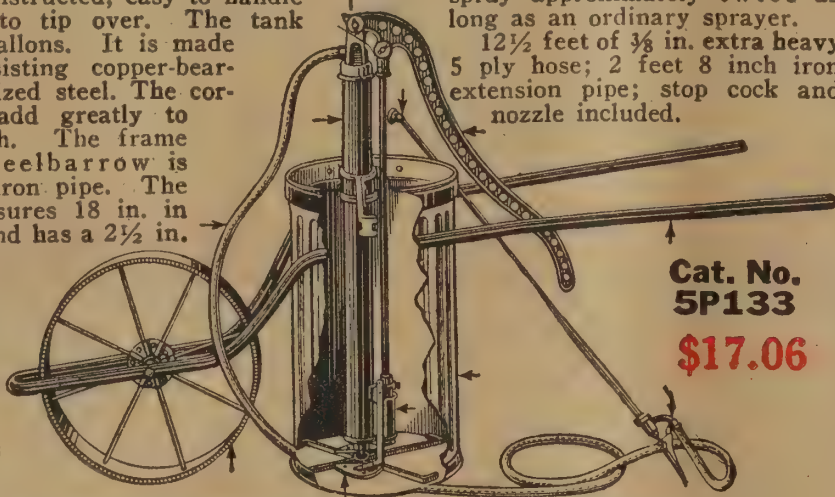

Heavy Wheelbarrow Sprayer

An ideal all-around portable sprayer for many uses. Suitable for insecticides, stock dips, whitewash, cold water paints, etc., as well as for general crop spraying. This outfit is sturdily constructed, easy to handle and hard to tip over. The tank holds 16 gallons. It is made of rust-resisting copper-bearing galvanized steel. The corrugations add greatly to its strength. The frame of the wheelbarrow is strong iron pipe. The wheel measures 18 in. in diameter and has a 2½ in. tire, thus you can easily push the sprayer over uneven ground.

Pump cylinder is made of seamless

brass tubing. Heavy iron pipe air chamber; semi-steel pump top; bronze ball valves; semi-steel handle and agitator. On account of the large capacity air chamber, the pump will spray approximately twice as long as an ordinary sprayer.

12½ feet of ¾ in. extra heavy 5 ply hose; 2 feet 8 inch iron extension pipe; stop cock and nozzle included.

Cat. No. 5P133

\$17.06

15 Gallon Wheelbarrow Sprayer

Similar to above, only it has a 15-gallon tank and 8 feet of hose. A real bargain at this low price. Place your order now.

Jim Brown FLY SCREEN BARGAINS

Don't be bothered with flies or mosquitoes—you can now screen all your windows and doors at very small cost. All my Fly Screen cloth is made of splendid quality wire and is made rust proof and weather resisting. Three qualities—the Black Enameled is covered with a heavy coat of black enamel that will not crack or peel and is 12 mesh, that is, 12 squares to the inch. The Galvanized is covered with a coat of tough, exceptionally durable galvanizing and is made 14 mesh (14 squares to the inch) and 16 mesh (16 squares to the inch). Copper Screening is made of pure copper wire and is 16 mesh (16 squares to the inch)—so fine that the smallest insects and mosquitoes cannot get through. Copper screen does not require painting and should give you a lifetime of service. We do not cut rolls. Freight Paid on All Orders of \$5.00 or More.

Galvanized Tanks

Heavy galvanized 20 gauge steel. Top and bottom flanges are formed as part of the side sheets, which assures rigid construction. Corrugations add strength and allow for expansion and contraction. Bottom and side seams tightly riveted, filled with elastic watertight packing. Round End Tank is ideal to serve two pastures, for grain and sap storage.

Cream Separators Bench Model

This separator is a "Baby Perfection" designed to be fastened on a bench or table. This machine is very efficient and is just the right size for 1 to 3 cows. The capacity per hour is about 225 lbs. or 110 qts. Furnished without bench.

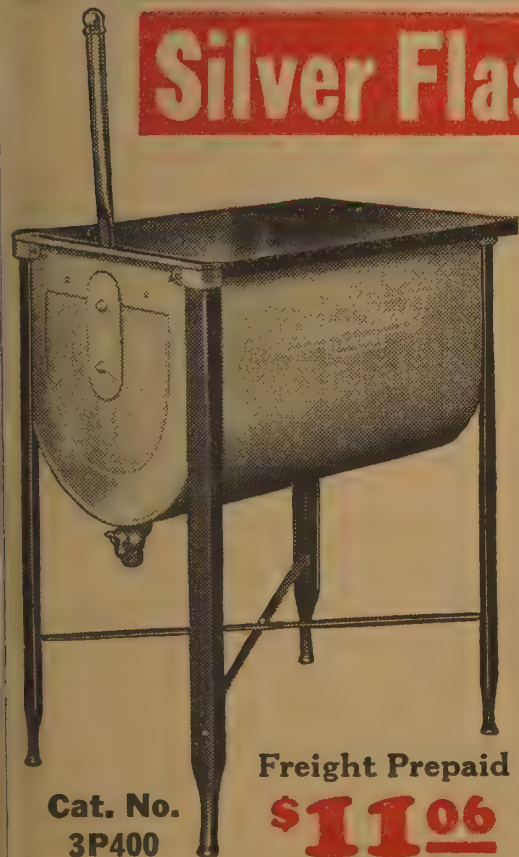

Cat. No. 5P2 \$20.00

NOTE—Write for prices on larger Cream Separators, Pumps, Water Systems, Concrete Mixers, Grain Bins, Corn Cribs, Harness, Saw Frames, Buzz Saws and Ventilators.

Silver Flash Washer

No Electricity Required
Uses Gravity Force

Cat. No. 3P400

Freight Prepaid
\$11.06

HERE IS YOUR OPPORTUNITY to end wash-day drudgery and to save time and money, as well—Buy a Jim Brown SILVER FLASH WASHER.

The Silver Flash will wash a tubful of the dirtiest clothes clean in less than 5 minutes. Just swing the compensating lever back and forth. The soapy water will do the job as it swirls and sweeps through every fiber. You can wash heavy blankets or dainty lingerie without harm.

There are no cogs, gears, or motor. The Silver Flash works so easily a child can operate it. It is also an excellent rinser and can be used between wash days as a kitchen table by removing the handle. You will find the Silver Flash to be the handiest, most helpful household implement which you possess. In fact, one customer states: "I like my Silver Flash better every time I use it."

Tub is galvanized, double seamed, reinforced at top, and guaranteed leakproof. Legs are heavy angle iron, cross braced, with oval, easy slide feet. Easy draining faucet is threaded for attaching hose if desired. Metal-sheathed wringer board on each end of tub for attaching wringer. (No hose or wringer furnished.) Outside tub is finished in beautiful green. Top, handle, and legs are black.

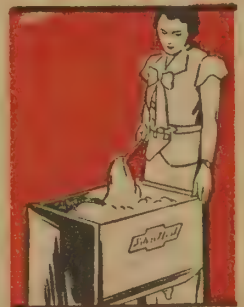

Washer: 31½" high, 24½" long, 17½" wide, 14½" deep. Handle extends 17" above tub. Capacity: 4 full size sheets, 4 pillow cases, and one or two small pieces.

NOTE: Wringer board, agitator and compensating lever.

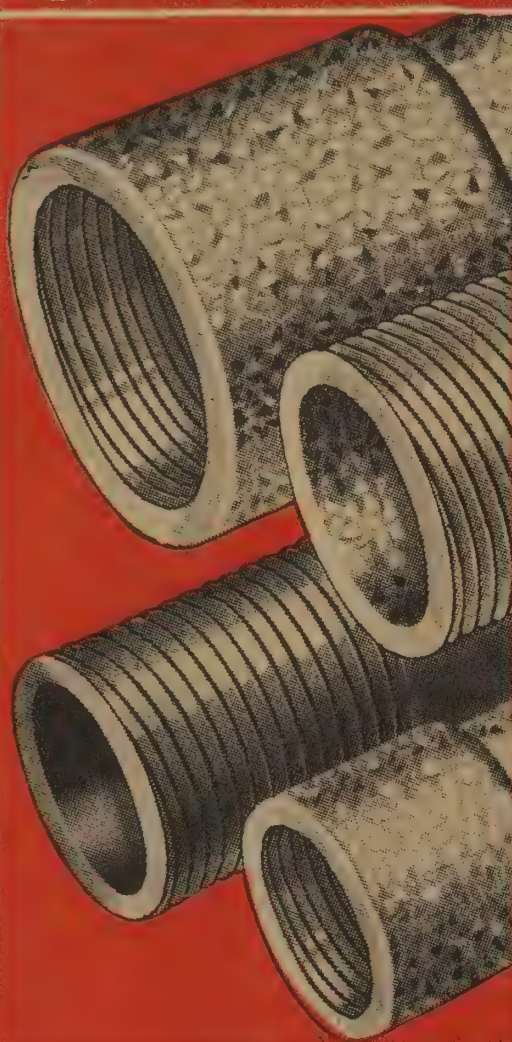

Operator stands naturally, assuming a correct posture.

Washer is right height for ease in handling the clothes.

FREIGHT PAID ON ALL ORDERS OF \$5.00 OR MORE

STEEL PIPE BLACK OR GALVANIZED

Brand New, Perfect Pipe at Money Saving Prices

This is brand new pipe and meets all standard specifications for weight, thickness, strength, threading. I do not sell "seconds," "rejects" or so-called "scratch" pipe. Every length is perfect.

Black pipe is just as it comes from the mill, with no coating, and is generally used for irrigation, oil, gas, steam, hot water systems, air lines, etc. Galvanized pipe is coated inside and outside with a heavy layer of zinc spelter put on by the hot-dip process which protects it from rust. Galvanized pipe is recommended for drinking water, supply and waste pipes, and wherever it is necessary for pipe to resist rust inside and outside.

In figuring sizes please remember that pipe is measured by **INSIDE DIAMETER**. (¾ inch pipe is almost 1" **OUTSIDE DIAMETER**.) Prices quoted are **PER LINEAL FOOT** in random lengths. Each length includes a thread on each end and one straight end coupling. At prices quoted we reserve the right to fill an order in random lengths of about 20 feet. If you specify certain definite lengths **ALL THREADS WILL COST EXTRA** as shown below, and **NO COUPLINGS WILL BE SUPPLIED** unless ordered extra. Couplings and other fittings shown below.

Jim Brown pipe is **QUALITY** pipe. At prices quoted I pay freight if your total order amounts to \$5.00 or more.

HOW TO ORDER For Cash or On Easy Payments

Most of our customers purchase on a CASH basis, sending full amount with order in the form of a Post Office Money Order, Express Money Order, Check or Bank Draft. Do not send currency by mail unless registered.

If you do not wish to send full cash with order and your order amounts to more than \$10.00, you may send one-fourth ($\frac{1}{4}$) of the amount with order and I will ship the goods, allowing the balance to be paid through your bank or postmaster. After paying the balance of the bill to the bank or postmaster you receive the bill of lading and the freight agent will deliver the shipment to you.

C. O. D. shipments cannot be made to railroad stations where there is no regular agent. If there is no agent at your station, you will save time by sending full amount of cash with your order. If you do not, I will have to write you for the balance before I ship the goods.

If your order is to be delivered to a boat landing, be sure to send full amount of your order in advance. C. O. D. shipments cannot be made to boat landings.

The size of rolls in which my various styles of field fence are made is shown in my catalog under each style number. Be sure the amount of your order can be shipped in stock size rolls. I DO NOT CUT ROLLS OF FIELD FENCING, WOOD PICKET FENCING, POULTRY NETTING, WIRE CLOTH, or SCREEN WIRE.

My lawn fencing is sold by the foot and therefore can be cut to any number of feet you desire. This, however, applies only to lawn fencing, chain link fencing, trellis or flower bed guard.

I pay the freight charges on all orders amounting to \$5.00 or more. If your order amounts to \$5.00 or more the material will be delivered to the freight station nearest the post office to which the catalog was mailed with all freight charges paid by me.

I also pay the postage on all orders for baby chicks, and nursery stock.

If you prefer to order on my Time Payment Terms, see Terms of Payment below, and fill in all the questions asked.

TIME PAYMENTS OFFERED ON ORDERS OF \$20.00 OR MORE

STOP THOSE ROOF LEAKS

QUICK with Jim Brown ROOF SAVER!

Only a Few Cents Per Square

Jim Brown's low price on Roof Saver makes it possible for you to keep your roofs in good condition for a few cents a square. Don't wait until your roofs leak. Look them over now. If they are dried out, thin in spots, and are getting old, give them a coating of Jim Brown Roof Saver. Add new life to the material and shut out moisture and air.

If your roof has already begun to leak, you may not need a new roof for many years if you stop the leaks with Jim Brown Roof Saver. This excellent product is made of liquid asphaltum in which long fiber asbestos is mixed as a binder. Test it by painting it on a piece of $\frac{1}{4}$ " mesh wire cloth and see how it makes it watertight!

As Low As

40c

Per Gal.
In 50 Gallon
Steel Drums

Contains No Tar or Lead—Will Not Wash Off

Jim Brown Roof Saver plugs up and seals all the seams, nail holes, and cracks. It forms a smooth elastic watertight surface. It contains NO TAR or LEAD. It will not run in summer or crack in winter, will not wash off, and does not color or taint rain water. Do not compare Jim Brown Roof Saver with cheap tar products. Remember, it costs as much for labor to apply a cheap covering which can't last as it does to use Jim Brown Roof Saver which sticks like glue and lasts for years.

Easy to Apply on Any Kind of Roof

No expensive labor is necessary to apply Roof Saver. Put on right over old roofing. Comes all ready to use—no thinner or mixing required. Apply it as it comes from the container. All that is needed is an ordinary paint brush or if covering a large surface you can save time and labor by using Roofing Brush shown below. Jim Brown Roof Saver can be applied on any gravel, metal, felt, or composition roof. We do NOT recommend this material for use over old shingles. It requires about 1 gallon per square for metal roofs, and about $1\frac{1}{2}$ gallons per square for ordinary roofs. For very old, dried out composition roofing, figure to use about 2 gallons for each 100 square feet. For gravel roofs or Slate surfaced roofing, use about 3 to $3\frac{1}{2}$ gallons to each 100 square feet. Roof Saver can also be used to protect and waterproof tanks, building foundations and silos.

For large holes and cracks, and for use around flashings, use my PLASTIC CEMENT which is a HEAVY material and is spread with a knife or trowel.

Leaky roofs spoil fodder and grains, rot sheeting and supports. Why take chances when you can make your roofs like new at such low cost per square. Order Roof Saver NOW.

READ THIS!

The Roof Saver and Plastic Cement which I purchased this spring of you are just fine. I find them to be all you claim and even more. They have stopped every leak, and stick on the roof fine and are sure worthy of putting on. I will say I am going to give you an order for some more in the future.

J. C. Palmer,
West Point, Ky.

Roofing Brush

Good quality. Heavy bristles. Ideal for spreading Roof Saver.

USE PLASTIC CEMENT

For Holes, Cracks, Flashings, Etc.

Plastic Cement is thicker and heavier than Roof Saver. You put it on with a trowel or big broad blade knife. Seals up the big cracks and holes. Use around chimneys—flashings—for filling in foundation cracks—stopping leaks in cisterns, tanks, etc.—glazing windows. Wonderful for filling holes in trees.

PAINT YOUR ROOFS

and Make Them
Last Twice as Long

SPECIAL HI-GRADE BLACK ASPHALT ROOF PAINT

Jim Brown Asphalt Paint is made of pure asphalt and oils. No coal tar or lead to discolor or taint rain water. Especially recommended for Asphalt Composition roofings. Adds years to their life. Also satisfactory for either metal or wood where a black coating will answer the purpose. This paint covers about 175 sq. ft. to the gallon, one coat work. A high grade black asphalt paint for use on all kinds of roofs, silos, foundations, and buildings.

Made in Black color only.

New-Life Roof Paint

BLACK or RED
for Composition or Metal Roofs

Here is my popular money-saving roof paint. It is just what you need for Metal or Composition Roofing—the cost is small—it's easy to apply—just like paint. Will save you a good many dollars. One gallon covers about 250 square feet. Dries quickly—won't chip, crack or peel. Is not affected by heat or cold—won't "run" in the hottest sun or crack

from frost and snow. Contains no tar or lead—won't affect rain water. Be sure to remove rust, scale and dirt before applying. Many thousands of gallons purchased every year. Specify Black or Red.

How to Figure Paint Required

Under average conditions JIM BROWN Barn Paint will cover 250 sq. ft. to the gallon, 2 coat work. However, it may require from 10 to 15% more if the surface is old and has never been painted before or if it is in poor condition. For example, a building 30' wide by 45' long by 20' high would figure as follows: 30 + 30 + 45 + 45 = 150' X 20' high = 3,000 sq. ft. of surface. Divide this by 250 sq. ft. of surface, equals 12 gallons of paint required.

SUPER-GRADE — For Those Who Want The Best Barn Paint Made

Many people want nothing but the best regardless of price. To meet that demand my Super-Grade Barn Paint was formulated. It meets every requirement of a tough, durable, attractive, protective coating for your barn. It spreads easily, covers thoroughly, brushes out over a large area and dries with a good color. Here is a real Super-Grade Barn Paint of guaranteed quality and you can buy it at a real saving.

Recommended for Expensive Barns

If you have a new building, start off right by giving it a coating that will properly seal the pores of the wood, and give a surface which will withstand the elements for years to come. Maybe you have an expensive barn that is in need of paint. Don't let it go unpainted and don't use paint that will chip, peel or wash off. You cannot buy a better paint than my Super-Grade unless you pay House Paint prices! You have a choice of 6 attractive colors including Big Four Yellow, all at the same price per gallon. Super-Grade Barn Paint priced above.

Jim Brown

BARN PAINTS

My Wearbest Paint Is a Money Saver and Barn Saver

Yes, Sir! I mean just that! I believe my price saves you at least 50c a gallon on barn paint. Investigate and prove it to yourself. Makes your barn look like a million dollars and protects it from the ravages of time and weather. Think of what just a few dollars invested in Jim Brown WEARBEST Barn Paint will do!

I have sold my WEARBEST Barn Paint to farmers in every section of the country. Many of these customers probably did not realize how good the paint was but bought it because it was low priced. Well, they know now that my WEARBEST Barn Paint really lasts, really protects, and really looks fine in spite of its low price. That's because it has quality oil and quality pigment in it, and is mixed by men who know how! My 46-year reputation for fair and square dealing assures your complete satisfaction or I will make it right.

It's Real Paint—But Low Priced

The first brushful of WEARBEST Barn Paint will convince you that it is real paint. One gallon covers 250 sq. ft. 2 coat work, and covers it well. Brushes out easily and dries with good finish. Just measure your barn and look at my low price on WEARBEST Barn Paint priced at the left. See how little it costs to give your barn an attractive and protective coating that will last for years. Send me your order today. Remember, I pay the freight on all orders amounting to \$5.00 or more.

How to Figure Paint Required

Under average conditions JIM BROWN Barn Paint will cover 250 sq. ft. to the gallon, 2 coat work. However, it may require from 10 to 15% more if the surface is old and has never been painted before or if it is in poor condition. For example, a building 30' wide by 45' long by 20' high would figure as follows: $30 + 30 + 45 + 45 = 150' \times 20' \text{ high} = 3,000 \text{ sq. ft. of surface. Divide this by 250 sq. ft. of surface, equals 12 gallons of paint required.}$

SUPER-GRADE — For Those Who Want The Best Barn Paint Made

Many people want nothing but the best regardless of price. To meet that demand my Super-Grade Barn Paint was formulated. It meets every requirement of a tough, durable, attractive, protective coating for your barn. It spreads easily, covers thoroughly, brushes out over a large area and dries with a good color. Here is a real Super-Grade Barn Paint of guaranteed quality and you can buy it at a real saving.

Recommended for Expensive Barns

If you have a new building, start off right by giving it a coating that will properly seal the pores of the wood, and give a surface which will withstand the elements for years to come. Maybe you have an expensive barn that is in need of paint. Don't let it go unpainted and don't use paint that will chip, peel or wash off. You cannot buy a better paint than my Super-Grade unless you pay House Paint prices! You have a choice of 6 attractive colors including Big Four Yellow, all at the same price per gallon. WEARBEST House Paint

Beautify and Protect Your Home for Just a Few Dollars

Here is a paint that must be a **QUALITY** product or I would not be offering it after so many years. Yet my price is extremely low. Wearbest House Paint is made of lead, zinc and other reinforcing pigments and ground in Pure Raw Linseed Oil, and mixed with Japan Oil and the necessary amount of drier and thinner. It is a formula that has stood the test of time. It spreads easily, has exceptional hiding power and covers a lot of surface per gallon. You will be delighted with the result of using Wearbest House Paint.

A Real Paint Bargain

I do not know where else in America you can buy the same grade of house paint as my **WEARBEST** at anywhere near my **LOW FREIGHT PREPAID PRICE**. The quality ingredients which go into this paint are the best the market affords, and are mixed by paint experts in a factory equipped with the most modern machinery. That's why **WEARBEST** Paint stands up under the elements. You need only try this paint and you will be convinced. It covers well, one gallon covering 300 sq. ft. 2 coat work, brushes on easily, and dries with a hard, smooth finish.

Guaranteed Satisfaction

My guarantee of satisfaction goes with every gallon of **WEARBEST** Paint that I sell. Read it on opposite page. Remember, Jim Brown **PAYS THE FREIGHT ON ALL ORDERS** of \$5.00 or more. (See page 53 "How to Figure Paint Requirements.") Interior paints shown on page 52.

E-CONO-ME House Paint

Best House Paint Made at This Low Price

Even if you are forced to economize, don't put off painting your house. My **E-CONO-ME** House Paint will beautify and protect your home for several years and costs very little. It is by far the best paint I have seen at its price. Contains the correct amount of pigment balanced with durable oils. Spreads easily, covers well, and goes a long way. Will not crack, peel, or check. Can be used indoors or outdoors with equal satisfaction.

Don't judge this paint by the price alone. I am sure you would have to pay considerably more for a paint of equal quality, if purchased elsewhere. I am also sure that even if you could get paint at the price of my **E-CONO-ME**, you would not begin to get as good quality.

Beauty and Protection at Small Cost

Thousands of gallons of **E-CONO-ME** House Paint have been used and home owners praise it as being the best low priced paint on the market. Next to my **Wearbest** shown above and 100% House Paint on the opposite page. I recommend my **E-CONO-ME** House Paint. It will give you real service, protection and satisfaction. The white is real white, and the colors are bright and true. See color card shown on opposite page.

If you want the highest grades of House Paint, buy my **Wearbest** or 100% brand. If you want the best low-priced paint, order my **E-CONO-ME** brand.

Only
\$1.00 **Per Gal.**

Jim Brown
50% Lead, 50% Zinc

100% HOUSE PAINT

There's No Better Paint Made—At Any Price!

Compare my formula with that of any high-priced house paint made by anyone, anywhere. Prove to yourself that Jim Brown 100% pure white lead and zinc paint is far superior—then look at my prices. Remember there is no inert material, no chalk, clay or other fillers in my Outside White 100% Pure house paint. Just look at my guarantee of satisfaction. All I ask is that you follow the simple directions and the paint will do the rest. I am sure you would have to pay \$1.50 to \$2.00 MORE per gallon elsewhere for paint anywhere near the quality of my 100%.

Ask Your Painter or State Chemist

Ask your painter or your State Chemist if a better paint can be made. I guarantee your satisfaction or your money back. Even after the paint has been on for years, if you haven't received the service you had a right to expect, I will make good.

Two coats of Jim Brown 100% Pure Lead and Zinc Paint will cover better than three or four coats of cheap paint. Its hiding power is amazing. Its covering capacity is such that you can completely hide any color with one coat and two coats will give you the greatest protection you could possibly put on wood. One gallon will cover at least 360 square feet, two coats.

100% Pure House Paint is the best paint I have ever heard of regardless of price. I challenge anyone to produce a formula that equals mine! Just read my formula and my guarantee. Look at the many beautiful colors at the right. Make your choice and save big money by sending me your order at the money-saving prices quoted.

Above is for Outside White. Colored Paint must necessarily contain other ingredients including coloring tints.

I GUARANTEE

I guarantee that Jim Brown paint will look better, last longer, spread easier and cover better than any other paint you can buy at my prices. I guarantee that you will be thoroughly and completely satisfied provided you follow directions in applying.

If you do not receive the number of years' service you have a right to expect from the grade of paint purchased, I will make an adjustment that will make up for the difference.—JIM BROWN.

BABY CHICKS

SUPER-GRADE CHICKS AT MONEY-SAVING PRICES

Over 7,500,000 chicks have been purchased from me in 6 years. Thousands of customers, in every part of the United States are delighted with the wonderful results they have had with Jim Brown Chicks. Such splendid Quality and real Performance make chick raising a pleasure and a PROFIT. Every Jim Brown Chick comes from a hatchery approved by Mrs. Canfield. Each hatchery must have a definite breeding program to improve flocks. All must hatch and ship baby chicks scientifically. Every hatchery must be reliable and give excellent service. When you buy chicks from me you get the protection of my reputation for fair-dealing and the added advantage of Saving in Price that my tremendous volume of business makes possible.

LET MRS. CANFIELD HELP YOU

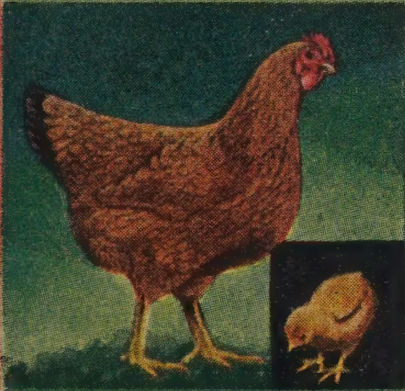

Write to Mrs. E. K. Canfield, % Jim Brown. She will gladly help you with your chick problems. Her booklet "How to Raise Baby Chicks" is free with your order. Buy healthy, Jim Brown SUPER-GRADE Chicks, bred for QUICK-GROWING and HEAVY-LAYING. I will replace, or make refund for any chicks not alive on arrival.
